VISION

To become the most effective and efficient local governance unit and promote total development for the people.

MISSION STATEMENT

To ensure and deepen participatory democracy and use it as a tool for bringing governance to the door-step of the people, improve upon the socio-economic life of the people, provide the requisite infrastructure and the acquisition of skills and training for meaningful employment generation and promote sustainable development

DISTRICT PROFILE

Historical background of Ayensuano District

Ayensuano District was named after the River Ayensu which runs through most parts of the District.

The river Ayensu takes its source from the Atiwa high lands in the Akim Abuakwa state in the Eastern Region of the Republic of Ghana.

Ayensuano District is made up of three (3) separate zones joined together. These are Obesua Zone which stretches from Yawkoko-Kwadwo Fosu – Apietu. Anum Apapam Zone stretching from Sowatey New Town on the Suhum-Asamankese lorry road and its environs which include Obuoho and Kofi Pare. Kraboa-Coaltar Zone which also stretches from Kwaboanta, Dokrochiwa, Kraboa-Coaltar down to Ayibontey.

The District was firstly called the Densuagya District when Addoagyiri, Sakyikrom, Mame Dede and Kofi Sah were part but with the cutting away of all communities as named above, the name Ayensuano was adopted to replace Densuagya.

The River Ayensu is the largest and the longest river flowing through the entire District. Some of the tributaries of the Ayensu river are rivers Kua, Anfa, Amo Kofi among others.

Some of the major towns in the District are Coaltar, Otoase, Teacher Mantey, Asuboi, Amanase, Sowatey, Anum Apapam, Kofi Pare and Dokrochiwa with Coaltar as the District capital.

Historical background of the District Capital – Coaltar

Coaltar is a community in the Ayensuano District which is formally part of the Suhum-Kraboa Coaltar District of the Eastern Region of Ghana. It is about 18km drive from the Saint Martin High School at Adoagyiri-Nsawam and about 38km drive from Suhum.

The land type is semi-savannah. The fertility of the land is very high, that it sustains growth of cash crops like cocoa, oil palm and citrus.

Historically, the initial name the town exhibited was Krabo Larteh. The origin f the name is that the people migrated from Larteh. Krabo, the name of the area was added to it, hence the name Krabo Larteh.

The first occupation of the people was hunting. Kraboakese was a place where bullets could be bought. The 'bo' means bullet and the 'kra' means send. So 'Krabo' means send for bullets. Therefore all the area stretching from Otoase to Coaltar were parts of the Krabo. But because those at Coaltar migrated from Larteh, they named the town Krabo Larteh.

For the name Coaltar, it came as a result of a man who painted his hut at the present Coaltar lorry station with a AC10 bitumen which we normally call 'Coal-tar'. At that time passersby stop and rest at where the hut was and had been calling it by the name 'Coaltar'.

The man who led the Larterians immigrants was Opayin Kwasi Wusu who later became the first chief of the town.

Realizing the harassment by thieves, he called for a meeting with the surrounding hamlets and discussed on the issue. On points of agreement he shared part of his land with them and they began building Coaltar.

Location and Size

The Ayensuano District is located in the southern part of the Eastern Region and shares boundaries with Suhum Municipality to the North; Nsawam Adoagyiri Municipality to the South, Akuapem South District to the East and Upper AYENESUANO DISTRICT ASSEMBLY West Akim District and West Akim Municiupality West. It lies within Latitudes $5^0 45^1$ N and $6^0 5^1$ N and Longitudes $0^0 15^1$ W and $0^0 45$ W. The District has about 320 communities of which 20 have less than 100 people residing in them. These are smaller farm settlements.

With a total land area of 450km². Ayensuano District occupies 2.3% of the total land area in the Eastern Region (19,323sq km) and constitutes 0.2% of the total land area of Ghana (239,460km²).

Climate

The District is located in the forest zone of Ghana. The climatic conditions are of the tropical type where average temperatures are usually high throughout the year. They range from 24^oC to 29^oC. The hottest months are March and April while the coolest months are December and January. Relative humidity especially in the rainy season (April to November) is 87% and 91%. In the dry season, it is between 48% and 52%.

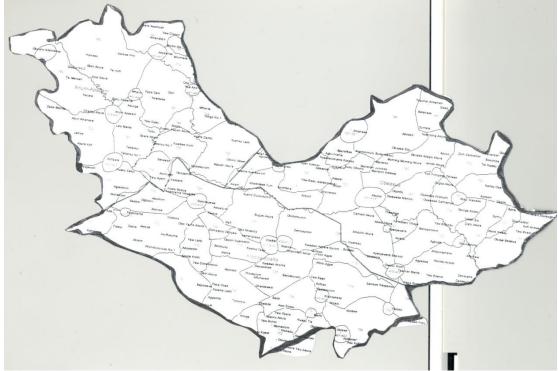

The rainfall pattern is influenced by the tropical monsoon winds which originate from the south-west and move to the north-east respectively. The first and major season occurs between April and July and the second and minor season occurs between September and November.

The annual rainfall figure for the district ranges between 1270mm and 1651mm.

Relief and Drainage

The District lies on a plateau which has been profoundly dissected over the years through gully erosion. The terrain is generally undulating and rises to an elevation of between 152m and 304m above sea level.

The area has a few highlands with the Atiwa range which stands at about 610m above sea level being the highest elevation in the district. This range is the catchment area of the major rivers and streams in the district, namely Ayensu and Kua.

District Map depicting various communities

Vegetation

The District was originally covered by a semi deciduous forest. However, human activity in the form of cultivation, lumbering and extraction of fuel wood has drastically reduced the land covered by the original vegetation to an insignificant level and is now covered mostly by re-growth thickets and secondary forests. Other types of vegetation like the elephant grass have also grown on farmlands where the fallow periods are not adequate and the fertility of soils have now been reduced due to sheet erosion. The "Acheampong" weed which was introduced into the country in the 1970s has also become very prominent on most of the fallow lands.

While the decline of the cocoa industry due to the bush fire of 1983 has resulted in ranchlands, especially in the Coaltar Area the situation has been exploited to produce non – traditional crops.

Ecology

The District has very suitable conditions for the development of agriculture and the lumber industry. Large scale production of cocoa took place in the early part of the 1930s. However, most of the cocoa farms were destroyed by the swollen shoot disease in the 1940s. Through the Eastern Region Cocoa Rehabilitation Project some of the farms were restored. However the bush fire of 1983 referred to above dealt devastating blow to the industry.

Production of food crops which is mostly subsistence is the other major agricultural activity but the shortness of the fallow period and bushfires have led to land degeneration and low crop yields. Land degradation has led to sheet erosion along the slopes, resulting in the siltation and drying up of rivers and streams during the dry season.

Major Soil Associations

The types of soil, where they occur in the district and what they are capable of producing are shown in the table below;

SOIL CLASSIFICATION	AREA FOUND	SOIL CAPABILITY
Kumasi-Asuansi/Nta-Ofin, Nsaba- Swedru/Nta-Ofin and Bekwai-Nzima/Oda Soil Associations	Kofi Pare, Anum-Apapam Kuano	 Export crops - cocoa, coffee, rubber, cola, oil palm. Non-traditional export crops – black pepper, sweet berry, ginger. Food crops - maize, cassava, cocoyam, plantain, potato, vegetables.
Atewa/Ansum,Adawso Bawjiasi/Nta- Ofin,Atewiredu-Katie and Atukrom- Asikuma Soil Associations	Amanase, Coaltar, Dokrochiwa	Well suited for hand cultivation of maize, cassava, cocoyam, cocoa, plantain, oil palm, ginger, tiger nuts, pawpaw and vegetables
Yaya-Bediesi/Bejua,Nyanao- Tinkong/Opimo and Pimpimso- Sutawa/Bejua Soil Associations	Tete Kasum	Suitable for the cultivation of crops, only with appropriate cultural practices.To be reserved for forestry, wildlife and watershed protection purposes.
Chichiwere-Ayensu/Kakum and Amo- Tefle Soil Association	Asuboi, Kyekyewere, Govinakrom	Suitable for the cultivation of maize, pepper, tomatoes, onions and garden eggs and pawpaw

Table 1: Major Soil Associations and their Capabilities.

Association		cassava, cocoyam, plantain, soya bean, banana, sugar-
		cane and vegetable
		Ofin Ntowkrom Soil

Source: Soil Research Institute (CSIR)

Generally, the soil found in the District is fertile for both cash and food crops such as cocoa, coffee, fruits, plantain, cassava, cocoyam, vegetables and cereals. The production of these crops helps to sustain food supply and reduces hunger and poverty in the District. Most of these crops are exported to other places such as Accra, Tema, Koforidua, among others.

Intensive farming activities for the production of both plantain and food crops and other human activities within the thickly populated areas have greatly influenced the nature of soils resulting in nutrient depletion, soil erosion, iron pan formation and land degradation.

Geology and Minerals

The District falls under the Birrmain and Voltarian formations. The major underlying rock is the Birrmain formation which is economically the most important geological formations in Ghana since it contains most of the valuable minerals exploited from the country for foreign exchange. Most of the hills are capped with iron pans, bauxite and kaolin. Gold and Bauxite are also embedded with the rocks. The rocks found in the District are suitable for both building and constructional purposes and can therefore be exploited to the benefit of the District. The mineral deposits can also be exploited to generate more revenue for financing of developmental projects and programmes. The exploitation of these mineral

resources, especially by illegal miners called galamsey cause havoc to the immediate environment – land degradation and pollution of water bodies.

LAND USE

Land use falls into the following patterns

a. Agriculture

Agriculture made up of cultivation of the cocoa & cash crop such as , oil palm, citrus farming, cultivation of food crop – maize, cocoyams, plantains, yams, vegetables etc

b. The non-agriculture land use include

- (i) Areas for housing in Human Settlements.
- (ii) Industry (block molding).
- (iii) Road and tracks

DEMOGRAPHIC CHARACTERISTICS

Population Size and Growth Rate

The District had a total population of 122,430 in the 2010 National Population Census, with males constituting 56,020 and 66,410 females.

Spatial Distribution

Most of the three hundred and twenty (320) settlements (localities) of the District have population of less than 500.

The largest settlement by population are Anum Apapam (5250), Amanase (4417), Asuboi (3426) Teacher Mante (3388), Coaltar (2789),Dokrochiwa (2647), Otoase (1771), Kofi pare (1723), Kuano (1438), Akyeansa (1420), Kwabonta (1284), Obuoho (1218), Sowatey (1138), Krabokese (1106).

Occupational Distribution

Due to the agrarian economy nature of the District, the agriculture sector employs about 64% of the District labour force. Animal husbandry and cash crop farming are on small scale. Production is predominantly rain fed and yields are generally low due to the intensity and distribution of rains not being even. The agricultural and forest resource base of the District facilitates the establishment of manufacturing and processing industries. Most of the road networks in the District are feeder roads that are in extremely poor conditions, especially during the rainy seasons. Consequently, transportation of food crops to the market centres is very difficult and expensive. These conditions, coupled with inadequate of suitable storage and preservation facilities are major impediments to increase agricultural produce. Ineffective extension services delivery, input supply, credit and mechanized services are some of the problems faced by the sector. These lead to low production, which is a major contributor to the low income levels of people in the District since the majority of them are into farming.

Migration Trends

It is estimated that about 87.6% of the population are local and permanent residents in the District while 12.4% are seasonal residents. This indicates that out-migration is very minimal. This can be attributed to the nearness to well developed cities like Accra among others.

Rural - Urban Split

There are only seven (7) localities in the District with populations that are over 5000 namely: Anum Apapam (8,928), Amanse (12,045), Asuboi (6,678), Coaltar (7,944), Dokrochiwa (13,755), Teacher Mantey (7,784) Kuano (7,770) and together they account for 35.58% of the District's population which can be classified as urban, according to a report on 2010 population and Housing Census. The rural urban split is therefore 64.42% to 35.58% meaning only one out of every two persons in the District lives in an urban area. This is lower than the region's average of one person out of three.

Social Characteristics

The District can be classified as a settler one with more than 90% of the people tracing their current ancestry from other Districts of the region or other parts of the country. Though the decline of the cocoa industry in the District led to people

leaving in search for new land elsewhere and the loss of business, people from less endowed parts of the country still continue to come in search of land for farming purposes

The district population is a mixture of all the ethnic groups of the country made up of the following;

Akan (37.4%) Ga – Dangme (25.6%), Guan (17.0%), Ewe (17.9%) Grunshies (0.9%), Gurme (0.4%), mande (0.2%) and Others (0.6%)

- The pre-dominant language of the district is Twi. In school all pupils learn Akuapem Twi.
- There is ethnic harmony in the District. This may be attributed to two factors namely the freehold ownership of their lands by many non – indigenous people which removes the problem of settler farmers having to perform feudal responsibilities, traditional land owners and the wise decision of the Akyem Abuakwa Traditional Council that allows non – Akyem to be chiefs. The latter gives the settler farmers a sense of belongingness.
- There are 12,564 households in the district and an average household size of about 4 persons.
- The literacy rate for all sexes is 48.6% but there is an imbalance between males and females 65.3% for men and 32.2% for females.

The percentages of the population above six years that have ever received some form of education are 48.3%. A third (32.0%) of the population has received Middle/JSS education and a total of 53.5% have had at least primary school

education. In all cases the proportion of males is far higher than that of females. However, only a total of 8.2% of the population have had post – basic education.

- In spite of its ethnic diversity, the traditional set up of the District is not so different from what obtains in other parts of Southern Ghana.
- The land tenure system in the District is quite different from what pertains in other Akan areas. The greater part of land owned by families or individual. This situation actually poses great challenge for development because of the difficulty in getting free land for social projects such as schools, clinics, and boreholes.
- There are two types of inheritance system in the District: The Akan speaking people are matrilineal while the rest including the Guans are patrilineal.
- The population of the district is made up of Christians, Muslims and Traditionalists. Christians constitute about 83% of the population, Muslims about 6%, Traditionalists 2.6% and people with no religion about 7%.
- All ethnic groups and people are free to observe their religious/traditional festivals in the areas they inhibit.
 However, they are more or less obliged to attend the festivals of their superiors. For example all chiefs who are under the Coaltarhene have to attend his Odwira Festival, which is observed in September to November. Festival like the Odwira attracts citizens back home. This enables them to see the state of development and what they can contribute to improve the situation.

• The major negative cultural practices include early marriages and denying pregnant and nursing mothers and children of some nutritious food items such as eggs among some ethnic groups. This happens mostly in the rural areas. However, the culture of the District is facing threats from contemporary practices that are being introduced into marriages and funerals.

SPATIAL ANALYSIS

Amenities

- Area Council centres Anum Apapam, Coaltar and Obeasua/Asuboi, and other settlement, Amanase, Dokrochiwa, Kofi Pare and Teacher Mantey serve as the service centre for the population.
- The key services that have created significant linkages within the District are education, health care, transportation, telecommunication and markets.
- Education up to the Junior High School level is reasonably accessible in the rural areas. However, only two settlements Coaltar and Amanase have Senior High Schools.

- The District does not have a Government hospital but is close to the one located in Nsawam. It has four (4)
 Government Health Centres each at Asuboi, Amanase, Dokrochiwa, and Coaltar. The District also has seven (7)
 CHPS compounds at Apaw Wawase, Marfokrom, Otoase, Bepoase, Anum Apapam, Kofi Pare, and Mfranta
- The District has no bank nor micro finance institutions
- The District has no judicial service. Thus people in the District have to travel to Nsawam, Asamankese and Koforidua to access judicial service but have a police station at the District capital, Coaltar.
- The District has no fire station.
- There is at least one bi-weekly market in every community in the District with the major market centres at Amanse, Dokrochiwa and Anum Apapam

Settlement Pattern

The settlement pattern is generally nucleus (cf: dispersed) type. However, there is this pattern of hamlets inhabited by a man and his family and a few other persons strung along the bush road or path which may bear the same name. This makes the location of amenities especially schools building and the extension of electricity very difficult and expensive. More boreholes are needed than what the population size call for.

ECONOMY OF THE DISTRICT

Structure of the Local Economy

Economically, the District can be described as agrarian because it has about 64% of its labour force in the agricultural sector. This is followed by commence which employs about 12% of the labour force and next t it is industry which is 11%. However, transport and clerical employs about 10.5% and 1.5% respectively. Since agriculture is the main stay of the District's economy, variations in weather pattern will lead to low yields and subsequently hunger and poverty.

A. Major Economic Activities (Socio-Economic Background)

i. Agriculture

It is estimated that about 70% of the economically active population of the district is engaged in agricultural production on full or part-time basis.

Size of Arable Land

The district is endowed with an estimated arable land of 31,000 hectares being 65% of the total landmass. A total of 22,410 hectares have been cultivated which represents 73% of the available arable land.

Problems Facing Agriculture

a) Unfavorable Land Acquisition Processes: – Most of the productive parcels of land are attracting very high rentals or oppressive lease conditions which have made it difficult for most farmers to acquire land;

- b) Financing: Inability to readily access financial assistance from both the formal and informal sectors has had adverse effects on expansion and modernization initiatives of most farmers.
- c) Shortage of Labour: There is a serious shortage of labour at all stages of the agricultural production cycle.This has affected the size of farms and eventually the quantum of output.
- Inadequate storage facility: The majority of farmers have only traditional barns, cribs and roof storage facilities to preserve and store grains. Non-availability of facilities to store fresh produce like vegetables and some staples like plantain and cocoyam compels the farmers to sell the product at low prices at the time of harvest;
- e) High Cost of Inputs: It was realized that farmers lack the financial means to purchase improved seeds, chemicals and fertilizers to promote production.
- f) Low Prices for Agricultural Produce: The farm produces are usually priced by the bulk buyers who come from urban centres like Accra, Koforidua and Nkawkaw, Kumasi. Due to the short preservation period for most of these items, the buyers offer low prices to the farmers. These low prices are a disincentive to the farmers and these discourage them from increasing output.

In spite of all these problems, the District is noted for its supply of agricultural produce to the commercial centres in the Eastern, Central, Greater Accra and Ashanti regions.

Storage Facilities

Field survey conducted in the District revealed that modern or improved storage facilities are not available for use by the farmers. The farmers are therefore invariably compelled to dispose of most of their produce as and at when it is harvested. The producers of vegetables (such as garden eggs, pepper, tomato, okra) and citrus are adversely affected as prices at which these perishable food items are sold fluctuate to the detriment of the producers. The buyers take advantage of their perish-ability and quote prices which mostly do not meet the expectations of farmers.

In the case of other crops like maize and yam, the farmers employ traditional method of storage.

Barns and Cribs as Means of Storing Excess Food.

About 70% of the producers employ traditional barns to store produce while 21.1% and 6.1% make use of roof-storage and silos respectively. Other crops like cassava are processed into gari and dough for sale in both the local and other markets.

Farming Systems

The major farming system in the District is mixed – cropping. The crops usually identified with this farming system include staple food crops like cassava, cocoyam, plantain, yam and maize. Due to the small sizes of the plots cultivated, the major crops which are cultivated are inter-cropped with vegetables like chilies, tomatoes, green leaves and various types of beans. This system tends to satisfy the basic nutritional needs of the farmers.

The slash and burn method is still employed in the preparation of land, where the cutlass is the main tool used in the process. Hoes and other digging implements are employed at the planting stage. The terrain to a large extent does not favour mechanized farming.

Livestock Production

Livestock rearing in the district is generally done on an adhoc basis. The animals and birds are allowed to roam about forage by themselves. However there are few kraals and commercial poultry farms.

INDUSTRY

There is no large scale manufacturing setup in the District. Manufacturing is therefore restricted to the small-scale industries and crafts.

Saw milling and Wood Fabrication

There are only few saw mills in the district due to the shortage of timber. The operations of almost all the saw mills are detrimental to the natural environment since they depend on illegal chain-saw operators for timber.

The saw mills provide raw materials for the carpentry and joinery workshops. There are about 175 of them at the moment. They are mostly one-man enterprises consisting of a master and his apprentices. The average number of apprentices per workshop ranges between 2 and 7.

Metal Fabrication

This consists of blacksmithing and welders. Black smiths use iron scraps obtained from local dealers as their raw materials. Their products are mainly farming implements. There are only a few enterprises. Welders are engaged in fabrication of metal gates, window frames, metal containers that serve as temporally structure as well as vehicle repairs.

Food Processing

Food processing is mainly in the area of production of gari, corn dough, cassava dough, palm oil and palm kernel oil by traditional methods and machines.

There were great interventions in the supply of machinery for agro – processing ventures during the period, by the ministry of Food and Agriculture as well as the 6th Micro – Projects Programme. Some of the equipment were Corn Mills, Cassava Graters, Oil Palm Extractors, Oil Palm slashers, Palm kernel Crackers as well as diesel engines to drive the above mentioned machines.

Alcohol (Akpeteshie) Distillation

The trade started first with the use of palm wine but sugar and yeast are now the main raw materials. The main source of energy is firewood which is obtained from the neighbouring districts of West and east Akyem.

Soap Making

Soap making is by both traditional and modern methods depending on the raw materials. The major input for traditional soap is ashes obtained from burnt cocoa husk, plantation and cassava peels etc, and palm oil or kernel oil, obtained in the District. The technology is crude: The ashes are added to boiling oil, stirred and allowed to cook for some time. The product, which is very dark, is sold in the local markets and patronized by mainly rural people.

Other Small-scale Industries

These include tie-and-dye making, dressmaking and manufacturing of foot wear. The district has a many dressmakers and shoemakers. Raw materials for tie and dye are obtained from textile factories and shops in Accra and Tema.

Problem Facing or Posed by Small-scale Industries

Small-scale industries in the District face some problems among which are:

- a. Inability to acquire adequate machinery because of low capital base.
- b. Inability or unwillingness of sole proprietors to come together and form more viable enterprises, in order to have the capacity to access bigger capital.
- c. Lack of an Industrial Estate.

Equally they have created problems such as the following:

a) Pile-up of industrial waste, for example sawn dust, in unauthorized places including residential areas.

- b) Creation of noise, for example by lathes.
- c) Exposition of the public to dangers such as electric sparks from welding torches
- d) Fire out breaks due to electrical fault, especially in welding.

Handicrafts

Popular handicrafts for which raw materials are obtained locally include the following;

i. Wood Products

Carving of drums, mortars, windmills, dolls and lathers is undertaken mainly in the District. The workshops are normally located in open places along the road, which makes it easier for the supply of the main raw materials. (neatly cut pieces of tree trunks) and marketing of the products.

ii. Rattan

Cane and palm branches are used to make baskets throughout the District.

iii. Pottery

Anum Apapam is noted for clay pots, which are sold on the local markets.

a. Craftwork

Craftworks can be classified into two main categories according to their use:

- 1. Domestic such as, pots & mortars
- 2. Industrial for example wood mills and lather turning and ornamentals such as dolls. They are patronized by both local and international tourists.

Commercial Activities

The District has various market centres for commercial activities especially marketing farm produce. These market centres' facilities are woefully inadequate and thereby distorts market operations especially when it rains. Trading is very important in the District with buying and selling carried out in shops and kiosks and from tables. However, the main areas for trading are the bi- weekly market at Amanase, Anum Apapam, and Dokrochiwa markets.

These are the places where farmers bring their produce for sale and in turn buy manufactured goods. In spite of the importance of the bi-weekly markets to the District's economy in particular to Internally Generated Fund (IGF) of the Assembly they do not have adequate number of structures as well as basic amenities on a regular basis.

Most of the market traders are women with very little capital and the few who have large turn-overs do not normally save with the banks and instead depend on susu collectors. They also depend on micro-financing organizations whose terms are said to be a bit harsh and according to some traders tend even to reduce their working capital.

Personal Service Providers

The informal sector of the District's economy has a lot of service providers such as hairdressers and beauticians, barbers, dressmakers, cobblers etc. Most of these tradesmen and women operate from temporary structures; wooden kiosks and metal containers sited along roads, streets, road intersections, alleys and every available free area in towns and villages.

Mining, Quarrying and Sand Winning

a. Gold Mining

Mining is mainly of the alluvial type in the basin of the Ayensu by both a by formal sector company and artisan miners also known as the galamsey operators. However the former has suspended operation due to misunderstanding between it and the host communities over an environmental issue. Unfortunately the contribution by the galamsay operators to public revenue is very negligible since most of them operate illegally.

The impact of mining activities on the environment has adverse effects in that Rivers and Streams, which serve as source of water for the environment has been destroyed.

In spite of its negative environmental impact small-scale mining is a potential source of employment for the youth. What needs to be done in the District level is to enforce national laws in the sector and alleviate the numerous social problems

it has created such as spread HIV/AIDS, prostitution, drug addiction and general lawless apart from environmental degradation.

b. Quarrying

There are many quarrying sites in the District which are yet to be exploited. There is a great potential for the quarry industry in the District given its proximity to Accra.

c. Sand Winning

There are many sand winning sites in the District which being exploited. This is greatly influenced by proximity of the District to Accra, the capital of the Republic of Ghana.

Economic Infrastructure and Services

Financial Services

The District is yet to have operation of a Financial Institution(s).

Services, Tourism and Hospitality

The provision of services in the district has a formal and Informal sector. Tourism in the District is completely under developed though there are some potential tourist attractions among them are waterfalls at Obuoho near Anum- Apapam, the Drum rocks at Obuotumpan and the snake-like palm tree at Obuoho Nyarko.

The number of hotels/guesthouses is four (4). This is inadequate. There are no restaurants in the District but there are many way-side chop bars which serve Ghanaian dishes.

Energy

The main sources of energy in the District are electricity, petroleum products and fire wood and Charcoal. Other source of energy for heating are kernel shells and palm residue.

➢ Electricity

The District gets it electricity supply from the Akyem Tafo sub-station. Many transformers are located in residential areas on the ground or on poles, while there are many houses dangerously near or under high tension lines. Other major challenges with the supply of electric power are the frequent damage to high tension lines by fallen trees and emissions. The crude coverage for electricity is about 40% of the population.

Petroleum Products

There is no Liquid Petroleum Gas (LPG) depot in the District but has only one fuel station and its located at Amanase. As a newly created District, it is hoped that LPG will soon be promoted within the District through the facilitation and encouraging the private sector to invest in that sector. This is hoped will go a long way in reducing the current pressure on wood with its corresponding effects on the environment.

Fire Wood and Charcoal

Fire wood – Dry wood and charcoal are the main sources of energy for cooking and heating. It is used for both domestic and industrial (Agro-processing, alcohol distillation and soap making). In view of the dwindling sources, akpeteshie distillers in the District now go to other Districts and Regions for supplies.

Telecommunication

Most parts of the District have mobile phone network coverage especially along the Nsawam stretch through Teacher Mante, Amanase, Asuboi, Kyekyewere, Budu and other adjourning towns and villages. The District Capital, Coaltar is also covered. In addition, this area do benefit from internet facilities as well. The main telecommunication services available in the District are Vodafone, MTN, Tigo and Expresso. Telecommunication in the District is fast spreading with various masts being erected in various parts of the District especially its capital, Coaltar and Dokrochiwa. Postal service in the District is located at Coaltar, the District Capital. Postal agencies serve the rest of the communities by receiving mails and selling postage stamps. Internet services in the District are fairly good. However, some of the communities in the District lack internet facilities. This situation has limited the District's ability to communicate effectively within and outside to enhance the District's economic development. It will be beneficial to the District if private individuals and organisations intervene to help improve communication services in the District.

Information and Communication Technology (ICT)

The Ayensuano District with support from the government of Ghana has constructed an ICT Centre at Kofi Pare with the vision to create universal access to information technology to promote community-based ICT applications for accelerated growth and development through effective and timely availability of information. Apart from the one constructed at Kofi Pare, there are other private owned internet cafes at Amanase, Coaltar and Asuboi. The ICT Centre constructed will help in educating both the general public and schools on information and communication technology in the District.

Roads

Almost all the roads in the District are feeder roads. These are roads which are not tarred and because of this, for the most part of the year are in bad shape making access to the communities very difficult and at time impossible during the rainy season. Since these roads link most communities, the transportation of far produce has become very difficult leading to post harvest losses and subsequently leading to poverty. As a result of that fact, most farm produce are transported by head porterage. Thus much needs to be done to help improve the transportation of farm produce from the hinterlands to the centre and services from centre to hinterlands.

Water Supply

The main sources of drinking water in the District are not intrinsically different from other rural areas which are boreholes, hand-dug wells, streams, rivers and ponds. Thus, the District is faced with a problem of inadequate water

supply, as a result of a geological paradox and inadequate rainfall. This problem has resulted in an intense pressure on the low yielding boreholes; coupled with inadequate rainfall has worsen the peoples plight of getting portable water for Domestic, Agri-business and Industrial usage. This indirectly affects productivity as workers and pupils have to spend their productive hours (5hrs or more) looking for streams and ponds, while others need to move beyond 8km. The effect of this is more felt within the dry season where women and children are mostly affected.

Environmental Sanitation

This is made up of solid and liquid waste management and that solid waste and liquid disposal in the District are similar in all the communities. Majority of the people (90%) dump their refuse openly at temporary sites created by the communities without regard to closeness to water bodies, drainage systems or their own settlements thereby creating highly unhygienic conditions.

In view of this, good sanitation is also not anything the District can boast of as a result of the fact that there are inadequate refuse dump sites and facilities which has result in dumping of refuses haphazardly with its health implications. However, the District is on the move of solving these problems with the introduction of ZOOMLION - a refuse management organization currently working in the District in collaboration with the District Environmental Health Department to acquire dump sites at prescribe locations in the District to help dispose of refuse properly.

BROAD MMDAs POLICY OBJECTIVES

2) STATE THE MMDA'S BROAD SECTORAL GOAL IN LINE WITH THE GSGDA/KEY STRATEGIES

Private Sector Competitiveness

To improve the prices of agriculture produce by 10% by December 2016

To incorporate modern techniques into agriculture production to achieve food sufficiency by the end of December 2016

To build a consensus with stakeholders to improve upon the land tenure system.

To provide adequate inputs for the agriculture sector

To increase electricity coverage from 35% to 65% by December 2016.

To provide solar powered electricity for 30no. settlements with population of 500 to 1000 by December 2016

To improve upon the technological base of artisans by December 2016

To improve the surface condition of 50 % of the feeder road network by December 2016

To increase the feeder road network by 20% by December 2016

To construct 20km of access roads to the periphery of Ayensuano by December 2016

To improve access to fixed telephone facilities by December 2016

To increase industrial activities by 40% by December 2016

To increase tourist arrivals by 30% by December 2016

To increase revenue from small scale gold mining activities by 40% by December 2016

To increase the output of quarries by 4% by December 2016

To provide about 100 JHS/SHS graduates with trade skills by December 2016.

To establish a data base on all jobs created through government and donor funded projects in the district by December 2016

To reduce the financial vulnerability among 500 public sector workers by December 2016.

To improve the capital base of market women through co-operatives by December 2016

HUMAN RESOURCES DEVELOPMENT

Education

To improve upon access to quality education for 70% of children in basic school by December 2016

To improve performance at the Basic Education Certificate Examination (BECE) by 50% December 2016

To increase enrollment levels in the basic schools to 95% by December 2016

To provide ICT Facilities for 10 basic schools before December 2016

To improve the retention of teachers by 5% by the December 2016

To promote the STME basic school pupil by December 2016

To increase the numbers of senior secondary school from 1 to 2 by December 2016

To improve upon the culture of reading among non-school literates.

To reduce the illiteracy rate by 5% by December 2016

To improve upon sports performance in the district by December 2016

Health

To improve geographical access to quality primary health care within 1- 10kms from 70 % to 85% of the population by December 2016

To reduce malaria cases by 30 % by December 2016

To increase the detection of T.B cases by 30% by December 2016

To reduce the level of malnutrition and micro- nutrient deficiencies in the district

To increase access to the care of diarrhoea disease by 30%

To increase access to basic care for worm infestation to cover KG and Primary School Pupils by 20%

Population management

To increase the family planning acceptor from 39% to 45% by December 2016

To increase the registration of births to about 70 %

To increase the registration of deaths to at least 80% by 2016

Water and sanitation

To increase access to potable water from 40% to 50% of the population by December 2016

Ensure the proper management of rural water facilities

To increase access to safe toilet from 10% to 20% by December 2016

To improve upon the collection and disposal of solid waste from 30% to 40% by December 2016

To treat at least 10% of the solid waste generated by December 2016

Urban Development Housing and Slum Upgrading

To reduce the number of unauthorized permanent structures by 50% by 2016

To reduce the number of unauthorized temporary structures by 50% by December 2016 To improve upon the drainage system in Ayensuano by December 2016 To increase the number of store/skills/sheds stores in Ayensuano by 20% by December 2016

Social Policy Framework

To provide all inclusive education for all children with disability by December 2016 To reduce the HIV/AIDS prevalence rate from 3.8% to 2.8% by December 2016 To identify and provide quality care for people infected and affected by HIV/AIDS by December 2016 The resolve 90% of cases in respect of violation of rights of children by 20% in December 2016 To reduce the number of juvenile cases by 50% by December 2016 To sensitize all stakeholders on what constituted child abuse by December 2016 To improve the performance of youth groups/Associations in their various fields of operation by December 2016

Good Governance and Civic Responsibility

To operationalize three (3)No Area/ Urban Council by December 2016

To increase female representation in the District Assembly up to 30% by December 2016

To improve upon office and residential accommodation

To register all persons who have attained the age of 18 years by December 2016

To ensure that at least 75% of the activities in the sub-district plans are fully implemented

To ensure that 4 MDAs (Town and Country Planning, welfare, community Development and Births and Deaths) are fully integrated into the District Assembly by December 2016

To train volunteers on how to rescue and assist victims of fire outbreaks and other accidents by December 2016

To ensure that at least 50% of all rate payers fulfill their obligation in respect of basic and properly rates by December 2016.

To achieve a budget surplus of 10% per annum in respect of Internally Generated Fund (IGF) and current expenditure by December 2016

To promote citizen participation in decision making

To revalue all properties in the district

To increase District Assembly – community interface by 50% end of 2016

To build a databank for the district by Decembers 2016

STRATEGIC DIRECTION-2014-2016

The Assembly has adopted the following strategies to be used to implement the 2014 Composite Budget as indicated below;

- Strengthening existing sub-structures for effective delivery
- .Strengthening the revenue base of the Assembly.

- Developing plans that are centered on engagement with communities which will involve the full range of key stakeholders participation.
- Include all issues of disability in development planning at all levels.
- Strengthen the capacity of MMDAs for accountable, effective performance and service delivery.
- Provide infrastructure facilities for schools at all levels across the country especially deprived areas
- Mainstream children's issues in development planning at all levels
- Increase access to safe, adequate and affordable shelter

STATUS OF 2013 BUDGET IMPLEMENTATION BUDGET ALLOCATION AND ACTUALS PER DEPARTMENTS

2012 Budget and actual (not applicable)

Table 1: 2013 Budget and Actual January to June 2013

DEPARTMEN T	GOODS AND SERVICES (GoG) GH¢			DONOR GH¢		ASSETS GH¢	
	BUDGET	ACTUAL	BUDGET	ACTUAL	BUDGE T	ACTUAL	

TOTAL	36,823.51		21,338.17

MoFA	23,909.44	-	-	-	-	-

STATUS OF THE 2013 COMPOSITE BUDGET IMPLEMENTATION

Financial Performance

Revenue performance

1. The two tables below show the revenue and expenditure performances of the Ayensuano District Assembly as at

June, 2013.

Revenue performance

Table 2: Revenue Performance for the District Assembly

Status Of 2013 Budget Implementation								
Financial Performance								
	Composite budget (ALL departments combined)							
	Performance as at June 30 th 2013							
Revenue Items	2012-June- December	Actual As at December. 31 st	2013 budget	Actual As at June 30 st 2013	Variance	%		

	budget	2012				
	GH¢	GH¢	GH¢	GH¢	GH¢	
Total IGF	519,393.00	65,057.60	215,900.00	81,795.70	(134,104.30)	38
GOG Transfers	200,204.17	-	20,000.00			
Compensation	0	0				
Goods and services	0	0				
Assets	0	0				
DACF	1,425,000.00	354,638.96	995,146.00	124,226.55	(870,919.45)	12.5
DDF	875,273.18		461,524.00	406,417.00	55,107.00	88
Other donor transfers	0	0				
TOTAL	3,019,870.35	419,696.56	1,692,570.00	538,839.25		

From the table above, an amount of GH¢519,393.00 was budgeted for the periods from June – December, 2012 of which GH¢65,057.60 was actualized. It can be seen from the table that the Assembly did not receive any GoG Transfer for the same period mentioned above and this could be attributed to the fact that it was one of the newly created districts. With respect to the DACF, an amount of GH¢1,425,000.00 was budgeted for June – December, 2012 and out of this, GH¢354,638.96 was received. Again, an amount of GH¢875,273.18 was budgeted for DDF but nothing was received for the periods stated above.

In January –June, 2013, an amount of GH¢81,795.70 was realized as an IGF out of budgeted figure of GH¢215,900.00. Moreover,

GH¢124, 226.55 was also received as DACF.

To improve the situation the Assembly has started up-dating its revenue data for the district and revaluation of properties.

Expenditure performance

Table 3: Expenditure Performance for the Assembly

Sta	tus Of 2013 Budg Financial Pe	-	on	
Сотро	site Budget (All De	epartments Comb	pined)	
	Performance as at	: June 30 th 2013		
EXPENDITURE ITEMS	2013 budget	Actual As at Dec 31 st , 2013	Variance	%
	GH¢	GH¢	GH¢	
Compensation				
Goods and services	36,823.51			
Assets	-			
Donor	21,338.17			
TOTAL	58,161.68			

The budgeted allocation of goods and services for all the departments was GH¢36,823.51. This figure comprised of GH¢23,909.44, GH¢6,811.70, and GH¢ 6,102.37 for MoFA, Community development and Social Welfare respectively as at 30th June, 2013. Meanwhile, GH¢21,338.17 was allocated to Agric as a Donor fund. However, no fund has been released to the decentralized departments.

DETAILS ON EXPENDITURE PERFORMANCE OF MMDA DEPARTMENTS

The tables below show the expenditure performance of the departments of the assembly.

Table 4: Status of 2013 Budget Implementation - Central Administration

Central Administration									
	Performance as at June 30 th 2013								
Expenditure Items	2013 budget	Actual As at June 30 th 2013	Variance	%					
	GH¢	GH¢	GH¢						
Compensation	-								
Goods and services	54,2573.00								

Assets	54,2573.00		
TOTAL	1,085,146.00		

The central Administration which co-ordinates all the activities of the other departments suffered financially as funds from the central government and other donor support that were expected to help carry out the budgeted activities were not received on time. Moreover, the Assembly is on the verge of having its own management code for the Central Administration and this made it impossible for us to budget for Compensation.

Table 5: Status of 2013 Budget Implementation - Department of Agriculture

	Status Of 2013Budge Financial Pe	-		
	Department of			
	Performance as at	: June 30 st 2013		
Expenditure Items	2013 budget	Actual As at June30th 2013	Variance	%
	GH¢	GH¢	GH¢	
Compensation	66,890.00			
Goods and services	26,760.00			
Assets	-	-		-

TOTAL	93,650.00		
-			

This table shows that an amount of GH¢66,890.00 and GH¢26,760.00 were budgeted for Compensation and Goods and Services respectively for the Department of agriculture. But no fund has been received yet in respect of the items stated above.

Table 6: Status of 2013 Budget Implementation - Community Development

Department of Community Development Performance as at June 30 th 2013							
Expenditure Items	2013 budget	Actual As at June 30 st 2013	Variance	%			
	GH¢	GH¢	GH¢	-			
Compensation	-	0	0	0			
Goods and services	6,811.70	-	-	-			
Assets	-	0	0	0			
TOTAL	6,811.70						

The table above indicates that the Department of Community Development was only given an allocation for goods and services for the year, 2013 an amount of 6,811.70 but this amount has not been released to them yet.

Table 7: Status of 2013 Budget Implementation - Department Of Social Welfare

Department Of Social Welfare							
	Performance as at June 30 th 2013						
Expenditure Items	2013 budget	Actual As at June 30 th 2013	Variance	%			

	GH¢	GH¢	GH¢	
Compensation	-	0	0	0
Goods and services	6,102.37	-	-	-
Assets	-	0	0	0
TOTAL	6,102.37			

From the above table it is evident that a fund has been allotted to the Department of Social Welfare with respect to goods and services. But this amount has not been given to the department because it has not been released yet.

18. Extension of Street Light District- wide	Extend street light system	-	On-going	40
19. Reshaping of minor roads	Minor roads	-	On-going	30
ENVIRONMENT				
20. Rehabilitation of selected toilets in the district	Toilets	-	On-going	10
28. Acquisition of final waste disposal site	Waste disposal site	-	Waste disposable site acquired at Dorkrochiwa and Amanase	70

KEY CHALLENGES AND CONSTRAINTS IN 2013

- Lack of reliable data about the District.
- Inadequate Office and residential accommodation facilities.
- Lack of logistics for effective service delivery.
- Lack of good motorable roads.
