PART A: INTRODUCTION

1. ESTABLISHMENT OF THE DISTRICT

The Agona East District Assembly was established by Legislative Instrument (LI) 1921 in 2008. It is one of the twenty (23) Metropolitan/Municipal/District Assemblies in the Central Region. It has Agona Nsaba as its administrative capital.

Agona East District is situated in the eastern corner of the Central Region within latitudes $5^{\circ}30'$ and $5^{\circ}50'$ N and between longitudes $0^{\circ}35'$ and $0^{\circ}55'$ W. It has a total land area of 667square kilometres.

2. POPULATION STRUCTURE

The total population of Agona East District is 85,920, according to the 2010 Population and Housing Census, representing 3.9 percent of Central Region's population (2,201,863). The females (44,885) make up 52.2% of the population as against 41,035 (47.8%) males denoting more females than males in the District (Table 1). The sex ratio 91.4, implies 91 males per 100 females which is on par with that recorded for the region (91) and a little above that of the nation, 92% (GSS, 2012; GSS, 2014). Throughout life, it is also expected that at every age mortality rates for females would be lower than that of males.

3. DISTRICT ECONOMY

a. AGRICULTURE

Agriculture is the major economic activity in Agona East District and engages more than 50.6% of the District's population. The high soil fertility supports cultivation of tree and cash crops, food crops, vegetables and sugarcane. Tree crops such as cocoa, citrus, oil palm and cola are cultivated. Food crops like maize, cassava, cocoyam, vegetables are also cultivated, and the District supplies Swedru, Akroso, Kasoa, Bawjiase and Accra markets.

The livestock sector is equally increasing, as an alternative livelihood programme in the District. The district can boast of experienced agricultural officers who are highly qualified to deliver free extension services to farmers to increase production. The District Department of Agriculture being the lead agency in ensuring agricultural development in the district is currently implementing the programme planting for food and jobs/planting for export and rural development initiated by GoG.

b. ROAD NETWORK

The road network linking most communities are in bad state and when it rains, accessing larger parts of the communities is very difficult. However, about 30% of the total road network is tarred whilst the remaining 70% is untarred. Overall coverage of feeder roads is about 189.90km and that of trunk road is 54.20 km. Road works which mainly required rehabilitation and gravelling were unattended to due to lack of funds. This further deprive the district of viable potential resources for rapid development.

B.1 HIGHWAYS

An estimated distance captured as highway in the Agona East District is about 73km. Out of this length about 34km is motorable representing 47% while the remaining 39 (53%) is unmotorable.

c. EDUCATION

The District has the following Educational institutions; 127 Pre-schools, 123 Primary Schools, 97 Junior High Schools, 6 Senior High Schools and 2 Technical Vocational Institutes as shown in the table below

e. ENVIRONMENT

Swedru, a sister district's capital is the only place with a waste disposal site for both liquid and solid waste generated in the district. All the other communities rely on make shift local arrangements most of which do not conform to accepted environmental norms. The poor waste disposal situation in Agona East is caused by inefficient and inadequate infrastructure facilities, especially insufficient drainage and toilet facilities.

The illegal activities of chain-saw operators, charcoal and firewood merchants have resulted in deforestation since the fuel wood related activities are not based on sustainable exploitation of forest resources and thus posing a threat to ecological stability and sustainable environmental development.

Traditional farm management practices, to wit, slash-and-burn; reduced fallow periods; reduced crop rotation cycles and the absence of agro-forestry practices among others have resulted in erosion on farmlands.

One major environmental problem especially in the villages is inter-house soil erosion. The foundations under several houses are exposed thus posing danger to life and property since many of these buildings are constructed with laterite.

Due to misuse and mismanagement of water bodies, for example dumping of refuse and soapy water into them largely due to ignorance and conservatism there is water pollution in some of the settlements. Air pollution in some settlements is caused by poor sanitary conditions arising from piles of rotting refuse.

f. SANITATION

Waste disposal (refuse and human excreta) is a serious problem in the entire district, toilet facilities are inadequate in most communities and even where they are available, they are in bad conditions. Hence, there is always pressure on the few toilets facilities, which unfortunately discourage their usage.

It is therefore not uncommon sight to see people using the bush as alternative places of convenience. The lack of acceptable refuse disposal systems or facilities is also a serious environmental problem in the District. In Asafo, Kotokoli Zongo and Kwanyako for example, there are only few refuse disposal sites and in most cases, they are not conveniently located in terms of distance from the users.

Community Led Total Sanitation (CLTS) is the approach being adopted to trigger communities and households to own and use improved latrine with hand washing soap. The unit has 17 staff members and has been able to declare six (6) communities open defecation free in the district

4. VISION OF THE DISTRICT ASSEMBLY

The vision of the Assembly is to; "enhance the human resource capacity of the people in the District for them to develop and improve their standard of living".

5. MISSION STATEMENT OF THE DISTRICT ASSEMBLY

The District exists to; "ensure sustainable and qualitative improvement in the living conditions of the people, through the efficient mobilization and usage of resources, to support the development of the agricultural, health, education, trading and other sectors of the economy in collaboration with the communities, NGOs, Private and other Development Partners".

It's funded by IGF, DACF, DDF, GoG, and Donor Fund (eg UNICEF)

There are currently 23 staff in the Environmental Health Unit.

It is challenged by poor funding and lack of vehicle for field monitoring and supervision.
