<sup>2020</sup> Composite Budget - Afigya Kwabre North District

### **PART A: INTRODUCTION**

### 1. ESTABLISHMENT OF THE DISTRICT

1.1 Location and Size

### 2. DISTRICT ECONOMY AGRICULTURE

Agriculture is the dominant economic activity which engages 47.5% of the active labor force. Major food crops grown by farmers include plantain, cassava, cocoyam, rice and maize. Cocoa is the main cash crop cultivated in the district. Major tree crops cultivated include oil palm and citrus.

Vegetables such as tomatoes, garden eggs, pepper and onions are cultivated

The second largest subsector of the economy is commerce/service which employs 41.8% whilst industrial subsector employs 10.7%. The district's nearness to Kumasi also encourages most people into commerce/service related activities. Thus, more people are engaged in trading activities to serve the people migrating from other areas into the district.

### a. MARKET CENTRE

The district has established weekly /daily (mini) markets at some communities including; Boamang, Kyekyewere, Kwamang, Tetrem, Amoako. The district can boast of four major weekly markets. These market centres are located in Kwamang, Tetrem, Kyekyewere and Boamang. About 75% of the district have access to these periodic markets. Despite the

2020 Composite Budget - Afigya Kwabre North District

existence of these facilities, there is still the challenge of post-harvest losses in the district which can largely be attributed to lack of storage system and processing facilities.

Middle women mainly from Kumasi, Suame, Agona and Offinso play an important role in the marketing of agricultural produce in the district. Most of the farmers sell off their produce to these middle women and men on market days which they in turn sell at urban markets within and outside the district. Unfortunately, these middle women dictate the prices of the agricultural produce and in most cases the negotiations are unfavourable to the farmers.

There is the need to promote the patronage of locally produced food stuff by the School Feeding Programme, second cycle institutions etc.

### b. ROAD NETWORK

#### c. EDUCATION

Thus the current situational analysis of the Education sector in the Afigya Kwabre North District Assembly shows a strong commitment towards providing quality education. The daily administration of education in the District is the responsibility of the Ghana Education Service. However, the District Assembly is responsible for the provision of infrastructure and the creation of an enabling environment for the progress of education in the District.

#### Formal Education

#### Types of Schools

There are thirty-five (35) kindergarten/nursery schools, forty-eight (48) primary schools, thirtysix (36) Junior High Schools, and three (3) Senior High Schools in the district. These figures include both public and private schools. Unfortunately, the district lacks a vocational school. These public and private educational institutions provide human resources development opportunities for children and youth in the district. At the JHS level, school enrolment is about 4,038. Like the pre-school level, boys' enrolment is higher than that of girls' at the JHS level as shown in the table above. This implies that as they climb the ladder to the top, the girls' dropout turn to be higher than boys. There is the need to put in place measures to ensure the retention of girls in school throughout the educational ladder. The number of mono desks available for over 4000 pupils is 1,871. The required is about 2,167 to close the furniture gap.

The inadequate number of furniture available at the KG, Primary and JHS level causes overcrowding in the classroom which is not conducive for learning. This also mounts pressure on the few existing making maintenance very difficult. The District Assembly in collaboration with Ghana Education Service should provide more furniture for schools to improve the teaching and learning environment to increase pupil learning and better schooling outcomes.

The number of trained teachers at the basic level decreases as the educational level rises. The total number of trained teachers at all the levels of education stands at 1,319 whiles that of untrained teachers stand at 78. The number of untrained teachers is highest at the preschool and primary levels. At the secondary school level, there is no record of non-professional teacher.

To ensure quality education at the basic school, there is the need to fill the existing vacancies and also increase the number of trained teachers to ensure the proper development of children

To ensure that untrained teachers perform creditably, measures are required to continue to retain them and to improve on their teaching skills. There is therefore the need to provide regular training to the untrained teachers; whiles the district makes effort to replace them with trained teachers in the medium to long term.

Key problems and challenges affecting improved educational standard in the District include the following:

- Low academic performance at the basic school level
- High number of dilapidated classroom infrastructure
- High level of congestion in schools

2020 Composite Budget - Afigya Kwabre North District

- Inadequate school furniture
- Weak supervision in schools
- Inadequate trained teachers especially in the rural areas and the pre-school level
- Ineffective ICT education in the district

#### d. HEALTH

There are Eight (8) health facilities in the district. These include Five (5) public health centres located at Ahenkro, Kwamang, Boamang, Tetrem and Kyekyewere and three (3) CHPS Compounds located at Nkwantankese, Adukro and Nsuotem. The district has no hospital. However the Assembly intends to upgrade Boamang Health into a District Hospital. There is no medical doctor in the district. The facilities are manned by Physician Assistants with the support of general registered and community health nurses.

The health centers in the District are being complimented by facilities in neighboring Districts such as the St.Patricks Hospital at Offinso and Komfo-Anokye. It is not easy to access these facilities due to the relatively poor nature of roads in the District.

The situation of human resource for health is gradually improving for all categories of nurses. However, there is still more room for improvement. The ratio of midwife/population is 1:2637 which is below the national standard 1:1350. The District cannot boast of Medical Doctors but has 5 Physician Assistants. The Physician Assistant/Population ratio stands at 1:8439. Training of staff in post basic Physician Assistant programme should be pursued to increase the number of Physician Assistants and nurses in order to reduce child mortality rates; and improve maternal health.

#### **Common Diseases in the District**

The District is endemic with Malaria as the top-most disease affecting over 35% of all OPD attendance at the health institutions. However in 2016 and 2017 there was a decline in reported cases of malaria due to use of the treated mosquito nets, insect repellents, mosquito control.

<sup>2020</sup> Composite Budget - Afigya Kwabre North District

Hence, strategies like subsidized distribution of mosquito nets, spraying of mosquito breeding places and environmental cleanliness should be promoted to reduce malaria prevalence to the barest minimum in the district.

#### e. WATER AND SANITATION

It is important as a district to safeguard sustainable access to adequate water which is of a suitable quality. The major sources of potable water for the inhabitants in the district include boreholes mostly provided by the Development Partners to communities and Pipe borne water from Ghana Water Company.

In all there are a total of 65 functional boreholes in the District. All the 26 communities in the district have boreholes although some dysfunctional. Communities like Ahenkro, Denase and Nkwantakese have access to Pipe borne water. The boreholes in the communities are managed by well-trained WATSAN Committees mainly through Pay-As-You-Fetch scheme.

Measures such as capacity building of the District Water and Sanitation Team, WATSAN committees, Water Committees, Area Mechanics and pump care takers must be put in place to efficiently operate and maintain these water facilities. Measures are also required to ensure reliability of pipe borne water supply and its extension to the newly developed urban/peri-urban areas of the district. There is also the need to protect the natural water sources and catchments areas from pollution and destruction of their vegetative cover. The coverage and access to potable water in the district is about is estimated to be 65%.

#### f. ENERGY

Electricity coverage is very widespread in the district. All major communities in the district are connected to the national electricity grid. The accessibility to electricity has created enabling environment for economic activities that require power to operate across the district without much difficulty

#### 3. VISION OF THE DISTRICT ASSEMBLY

To become a highly professional and responsive Local Government Authority that provides basic public services which meet the development needs of the people within the district.

### 4. MISSION STATEMENT OF THE DISTRICT ASSEMBLY

The Assembly exists to strategically formulate plans and programmes through citizens' participation for effective mobilization of human, material and financial resources for development. This should bring about a qualitative change in the physical environment and the livelihoods of people in the district.
