# PART A: STRATEGIC OVERVIEW

#### **1. ESTABLISHMENT OF THE DISTRICT**

#### 1.1 Location and Size

Kwahu Afram Plains South is located between Latitudes  $60^{0} 40^{1}$  N and  $70^{0} 10^{'1}$  N; longitudes  $0^{0} 40^{1}$  E and  $0^{0} 10^{1}$  E; at the North-Western corner of Eastern Region with a total land area of approximately 3,095sq km. The District shares boundary to the north with the Kwahu Afram Plains North, to the south with the Kwahu South, to the east, the Afram River and to the west two Districts in the Ashanti region precisely Sekyere Afram Plains and Ashanti-Akim North Districts.

There are three main entrances into the District by road; namely Nkawkaw-Mpraeso-Bepong-Kwahu Tafo and Adawso from where the three-kilometer-wide Afram River is crossed to Ekye-Amanfrom by ferry operated by the Volta Lake Transport Company (VLTC). The second entrance is through Agogo in the Ashanti Akyem North in the Ashante Region where one can travel by road through Dome to Maame Krobo then to Tease, the District capital and the third entrance is the Donkor krom road through Samanhyia, Odumase Dedeso to Tease.

#### **POPULATION STRUCTURE**

Using the growth rate of 3.2 from the 2010 Population and Housing Census data, the total population of the district is projected at 144,889, consisting of 78,129 males (53.9%) and females 66,760 (46.1%). The projected higher male population is due to the fact that the District is a typically migrant destination. Most of the people in the District are migrants from the Volta Region and the Northern Ghana who have been attracted to the area basically for employment in the agricultural sector and it is usually the men who migrate. It is projected that 26.8 percent of the population between the 0-14 age cohorts represent current as well as future needs of the District with respect to increased investments in education, health and skills training sectors of the District. Efforts are geared towards increasing employment opportunities to cater for the youthful population as 66.2 percent of the total population fall within the youthful age cohort of 15-64 years.

The district has a broad age cohort which indicates a projected more males than females at birth and at the mature stages of life (0-64 years).

# 6. DISTRICT ECONOMY

#### a. AGRICULTURE

Agriculture remains the major economic activity in Kwahu Afram Plains South District by virtue of its percentage employment, which is 77.4% of the total employed labour force. Agriculture is however divided into three major sub sectors- crop sub sectors, animal sub sectors and fishery sub sectors.

About 90.1% of the farmers are into crop production. The favorable climatic conditions and the geo-physical characteristics of the area support intensive crop farming. These and other factors such as the availability of arable land account for the high crop production. Most of the food crops are grown mainly to be sold for income and the rest to be consumed by the family. There is high potential for tree crops such as cashew and oil palm but such crops have not been grown in large scale in the district. There are two main farming seasons in the District; from March – July and August – December for the major and minor seasons respectively. Maize, groundnut and cowpea are grown in the two seasons whilst yam, guinea corn and cassava are grown once in a year.

The incidence of disease and pest on a particular farm largely affects the output produced. In the Kwahu Afram Plains South District, the common crop diseases found in the area include maize streak; cassava mosaic; dumping off, wilt and rot, leaf curl and fruit drop in vegetables and pests such as termites, maize borers, rodents, nematodes and grass cutters.

2020 Composite Budget - Kwahu Afram Plains South District

Large majority of the farmers do not have access to the services of Agricultural Extension Agents. The extension officer-farmer ratio in the District is currently 1:4000. This situation has led to inadequacy of extension officers (the frontline officers) who assist farmers to address emerging problems and introduce them to new techniques. Concerning access to veterinary services for animal farmers, the picture is even worse. Over 70% of the farmers do not have access or use veterinary services.

71 percent of crop farmers sell their produce outside the Kwahu Afram Plains South District. The presence of ready market in the District (Tease, Mama Krobo, Dome, Kwesi Fanti, Ekye Amanfrom) serves as an incentive drawing farmers to sell their produce in the District. This ready market also aids in the prevention of post-harvest losses which would have occurred as a result of absence of storage facilities in the District.

The District's main markets are in in Tease, Ekye Amanfrom, and Maame Krobo. Items traded in these markets include agricultural and non-agricultural goods.

#### c. ROAD NETWORK

The road network in the district is mostly feeder roads which link up agriculture production centers and major settlements.

# d. EDUCATION

The Kwahu Afram Plains South District currently has Basic and Second Cycle Schools. The introduction of the Capitation Grant and the School Feeding Program for basic schools nation-wide, are contributing factors to the increasing number of pupils in schools in the District.

There are currently 188 schools in the District with 154 being basic. Out of the basic schools we have in the district, 32 of them are J.H.S. The district has only two (2) Senior High Schools at Tease and Maame krobo

Gross teacher-pupil ratio for the District has also been seen to be increasing per every academic year; 6:89, 6:92 and 7:99 for the 2014/15, 2015/16, 2016/17 academic years respectively. This phenomenon can simply be explained in terms of the proportionate increase in the number of students enrolled in schools yearly as compared to the limited number of teachers trained and employed.

Much effort (especially from the District Assembly, Education Directorate and development partners) is needed to equip teachers with the required training and logistics to teach the pupils (with much attention on the female pupils) in these core and important subjects. STME clinics for the female pupils should be given the needed attention (in terms of technical and logistical support) to help the female pupils develop interest in science and technology.

Hence, high literate population gives an indication of a high public understanding and contribution in the formulation and implementation of policies, programs and projects in the society. Table 1.32 gives summary of literacy levels by sex of the district. Nearly half of the population of the district are illiterate.
