### 7. DISTRICT ECONOMY Agriculture

The Local economy is dominated by the Agriculture sector. It employs about 78% of the Labour force in the district. However, due to relatively small farm sizes and low yields, poverty level among the farmers is very high. Farmers in the District are predominantly peasant, cultivating food crops and few cash crops. The food crops include cassava, plantain, cocoyam, yam, rice and maize. The cash crops are cocoa, oil palm and citrus. A major problem of Agriculture in the district is poor storage facilities and poor road conditions resulting in high post-harvest losses.

#### **Market Center**

The district has only one main market centre at Jacobu, the district capital and few satellite markets in some of the communities. The nature of the settlement pattern and road network has made patronage of these markets rather poor, thereby causing high post-harvest losses.

#### **Road Network**

Transport serves as a vital utility which has direct impact on the socio economic and the political aspects of the people. Most parts of the district lack tarred roads. The road densities are low, meaning and that roads are not connecting many communities. This sparseness of the roads contributes to poor supply of food and other farm produce such as cocoa, cassava, and timber from production centres resulting in high post-harvest losses. Accessibility to services could therefore be described as poor

#### Education

The District has 104 Pre-schools, 102 Primary schools, 45 Junior High Schools, 2 Senior High Schools and 1Vocational/Technical School. Accessibility to the Senior High School is very limited due to the limitation to some boarding facilities in the School.

#### Health

The District has one hospital located at the District capital, Jacobu and 6 clinics located at Tweapease, Mile 14, Numereso, Abuakwaa, Fenaso No.1 and Hia No.1.

14 trained Traditional Birth Attendants (TBAs) and 5 CHPS compounds which complement the services of the Hospital.

The key personnel in the District's Health Delivery System include Seven (7) Medical Officer comprises of four (4) Specialist and three (3) Physician Assistants, one (1) Pharmacist, fifty (50) General Nurses, ninety-six (96) Enrolled Nurses, thirty-five (35) Midwife and eighty-one (81) Community Health Nurse. The doctor-population ratio of 1:14,065 and nurse-population ratio of 1:674 put too much burden on Doctors and Nurses. The high ratios coupled with inadequate logistical support have negative impacts on the health delivery system in the district. The situation is very alarming and therefore the District Health Directorate and the District Assembly is putting in measures to increase the number of doctors and nurses and other vital health personnel as well as increase infrastructure, equipment and other medical supplies.

#### AMANSIE CENTRAL DISTRICT ASSEMBLY

#### Water

Small town water system, borehole, hand dug wells and rivers/streams constitute the main sources of water for both industrial and domestic purposes in the District. Among these sources, the small town water system at Jacobu and bore holes scatted at length and breadths are considered as the sources deemed most potable. The number of communities with access to each of the sources is shown in the Table below.

Type Of	Facilities	No. Of	Communities				
Source	No. Of facilities	Outlet	No. Of people served	Total No. Of people that have access to Water	%		
Small town water system	1	23	100	2,300	2.5%		
Borehole	257	257	300	77,100	88%		
Hand dug well	56	56	150	8,400	9.5%		
Total	314	336	550	87,800	100		

### Source: DWST, Jacobu 2017

About 89% of the communities have access to safe drinking water. This comprises 1 small town water supply system at Jacobu, 257 boreholes and 56 hand-dug wells district wide. Jacobu is the only community in the district that has access to small town water system. There are 257 boreholes in 122 communities and 56 hand-dug wells in 42 communities. A sizable number of the communities have more than one borehole.

Apart from the 89% of the communities that have access to potable water, a significant proportion of the households continue to draw water from rivers and streams due to inadequacy and unreliability of facilities.

In 2009 about 138 boreholes meant for 74 communities in the District were drilled. This has helped solve the acute water problem in the district. The district has improved its potable water supply from 30% to 89% between 2007 till now. The lack of access to potable water leads to prevalence of water borne diseases like diarrhoea and cholera.

#### SANITATION

Type of Toilet Facility	No. of facility	Total No. of seaters	User per seater	No. Population served	Percentage (%)
Aqua Privy (12seater)	37	444	50	22200	92
WC(8 seater)	1	8	50	400	2
WC(10 seater)	2	20	50	1000	4
Vault chamber (8 seater)	1	8	50	400	2
TOTAL	742	480	200	24,000	100

Access to a clean environment is a pre-requisite for quality life. The sanitation situation in the District is steadily improving.

The relatively larger communities like Jacobu, Tweapease and Fiankoma have peculiar problems due to rapid increase in their population and small number of facilities available. Lack of motor bikes to monitor environmental situation in the district has led to poor supervision and monitoring of the situation in the district. The poor environmental situation arising from improper waste disposal has therefore led to the prevalence of diseases like diarrhoea, cholera and malaria.

#### **Toilet Facilities in the District**

Problems with Sanitation in the district are Inadequate disposal sites, especially Jacobu, Inadequate refuse trucks and pay-loaders, Inadequate staffing, Attitudes of the people, Inadequate financial resources.

#### **Geology and Minerals**

The District is underlain by three geological formations. These are the Birimian, Tarkwaian and Granite rocks which are rich in mineral deposits. Gold is abundant in the district and mostly located at Apitisu, Amamom, Anyankyiremu, Adubrim, Fiankoma, Jacobu and Aketechieso. In addition, there are sand and gravel, deposits at Patase
