### PART A: STRATEGIC OVERVIEW

### 1. ESTABLISHMENT OF THE DISTRICT

The Tolon District Assembly was established in 2012 by LI. 2142, with Tolon as its district capital.

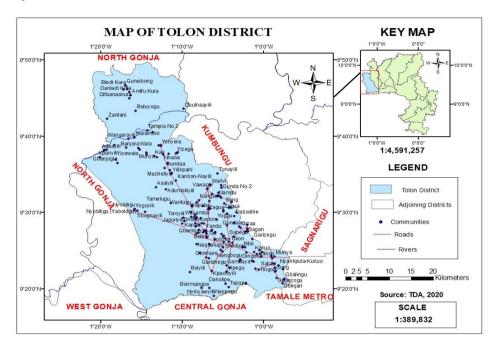

#### 1.1 Location and Size

The District is located at the South Western part of the Northern Region of Ghana. It lies between latitudes 9° 15° and 10° 02° North and Longitudes 0° 53° and 1° 25° West. The District shares boundaries to the North with Kumbungu, North Gonja to the West, Central Gonja to the South, and to the East is Kumbugu District, Sagnarigu Municipal and Tamale Metropolitan Assembly. It also covers a total land area of 1353.66Sq. km.

Generally, the District has two main settlement patterns. The linear settlement, where most of the communities and houses are said to be along White Volta or trunk road linking Tolon and Nyankpala; and nuclear settlement, where villages or houses are said to be clustered.

The District Assembly has 24 elected members and 11 Government appointees; adding up to 35 members. The District Chief Executive and one Members of Parliament are also members but have no voting rights. There are other sub-committees that help with the decision making process of the Assembly; these include the Executive committee, the Finance and Administration, Works, Development Planning sub-committee and Social Services, Public Relation and Complaint subcommittee. The district also has four (4) Area Councils and two (2) town councils. There are 24 Unit Committees and one (1) Parliamentary Constituency.

Figure 1: DISTIRCT MAP

### 1.2 POPULATION STRUCTURE

The population of the district in 2010, according to the Ghana Statistical Service was 72,990 (2010 Population and Housing Census) made up of 36,360 males and 36,630 females. The population of the district stood at 72,990 (2010 PHC) and a projected current population of 98,231 with the following gender segregation.

Table 1: Population Structure of Tolon District

Sex	Population	Projected current Population	Percentage (%)
Male	36,360	48,939	49.82
Female	36,630	49,292	50.18
Total	72,990	98,231	100

### 2. VISION

"Well-planned and sustainable communities with high levels of living standards and broad-based infrastructural development".

### 3. MISSION

To ensure sustainable and integrated development of the people within the context of social equity, resource mobilization, qualified personnel, and popular participation".

### 4. GOALS

To expand and strengthen socio-economic development to contribute to job creation; reduce poverty; sustain the environment; and enhance participation at all levels.

### 5. CORE FUNCTIONS

The core functions of the Tolon District Assembly are as follows:

- Ensure the preparation and submission of:
  - (i) Development plans of the district to the NDPC for approval, and
  - (ii) The budget of the district in relation to the approved plans to the Minister of Finance for approval;
- Formulate and execute plans, programmes and strategies for the effective mobilization of the resources necessary for the overall development of the district;
- Promote and support productive activity and social development in the district and remove any obstacles to initiative and development;
- Initiate programmes for the development of basic infrastructure and provide municipal works and services
- The development, improvement and management of human settlements and the environment in the district;
- Co-operate with the appropriate national and local security agencies, for the maintenance of security and public safety in the district;
- Ensure ready access to Courts in the district for the promotion of justice; and
- Initiate, sponsor or carry out studies that are necessary for the performance of a function conferred by this Act or by any other enactment

### 6. DISTRICT ECONOMY

### Agriculture

The District is basically agrarian in nature with about 88.8% of its labour force being farmers. In both rural and town areas of the district, most people cultivate food crops like maize, rice, groundnuts, yam amongst others. Observations from a field survey indicate that, the method of farming is basically traditional using hoes and cutlasses. Food production in some cases is mechanized with the use of few tractors.

Studies have indicated that along the banks of the White Volta, irrigation farming is feasible and can take place throughout the year. Tolon District has a comparative advantage over the other districts in the northern region due to its numerous potentials. The District Assembly really encourages dry season farming through the one District One dam government flagship programme. The District is endowed with vast truck of pasture suitable for livestock production.

### **Market Center**

The weekly markets at Nyankpala and Katinga in the district are the major marketing centers where commodities are traded. There are also satellite markets in bigger towns of the District namely, Tolon, Zantani, Lingbunga and woribogu. This serves as major sources of internally generated revenue to the assembly. The Assembly has made conscious efforts in renovating 46 number market stores and constructed 10 additional stores at Katinga market. However, these markets are not well developed hence, needs infrastructural uplift.

### **Road Network**

The state of roads within the District are bad. The district is served by a single tar road (10%) linking Tolon and Nyankpala to the regional capital Tamale. The rest of the network (90%) is made up of feeder roads which are dusty during the dry season but rendered almost impassable during the rainy season. During the rainy season, however, the northern part of the district (known as Overseas) across the White Volta is cut off, and canoes become the only means of transport during this period.

### Education

The Tolon District Directorate of Education have 9 educational circuits namely; Nyankpala West, Nyankpala East, Tolon West, Tolon East Tali, Kasuyili, Chifoyili, Yoggu and Lungbunga. The District has 79 KGs, 79 Primary Schools, 26 Junior High Schools, 2 Senior High Schools and private primary schools 12.

However, it is sad to note that, the District is among those in the country with serious deprivation and recording one of the lowest literacy levels in the Northern Region. The 2010 PHC for instance, indicates that, Tolon has 73.8% of the population who are not literate in any language as compare to the Region percentage of 62.5. That apart, the District shows vast difference between rural (4.3%) and urban (21.9%) literacy which is worst compared to the rest of the districts in the Region. This calls for deliberate efforts toward lifting the standards of education in the area.

#### Health

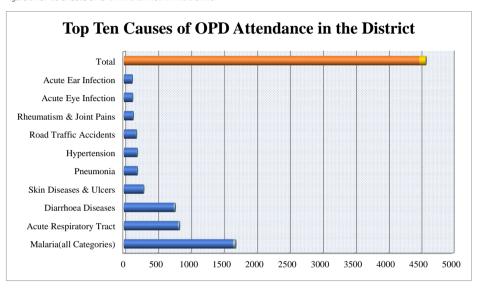

The provision of quality health care delivery remains one of the top priorities of the District. However, the existing condition and distribution of Health Facilities is poor leading to poor access to quality health care delivery.

The District has 159 communities based on Community Based Surveillance (CBS) concept. Access to health facilities in the Tolon District is said to be 54.2% as against 35.0 per cent of households in the region who take less than 30 minutes to reach the nearest health facility, and that of the national average of 57.6% (Core Welfare Indicators Questionnaire, 2003). Thus, relatively though the district may look good, in reality, the area still lag behind in terms of health need which calls for serious attention. The district has 21 health facilities these include 4 Health Centres, 15 Community Based Health Planning Services (CHPS) compounds and 1 Clinic (UDS) and 1 on-going District Hospital. The District has 6 main sub-districts;

Tolon sub-district (Tolon Health Centre, Dimabi CHPs and Gburimani CHPS), Nyankpala sub-district (Nyankpala Heath Centre, Gbulahegu CHPS, Tingoli CHPS. Tunayili CHPs and UDS clinic). The Wantugu sub-district (Wantugu Health Centre, Lingbun Gudaa CHPS) Lingbunga sub-district (Lingbunga CHPS, Zantani and Gbanjogla CHPS, Kpendua sub-district (Kpendua CHPS, Chirifoyili CHPS and Tali CHPS) and Kasuyili sub-district (Kasuyili health center, Wayamba CHPS and Yoggu CHPS)

The Figure below displays top ten causes of OPD attendance in the District. Thus, conditions Malaria (all categories) seem to dominate especially among pregnant women with 37% whereas Acute Eye Infection 3% assumes a minimal condition. Though interventions such as Indoor Residual Spray (IRS), Long Lasting Insecticide Net (LLIN) universal coverage, Intermittent Preventive Treatment (IPT) at the ANC, C4D activities etc. there is therefore the need for more education to help check the situation.

Figure 2:TOP 10 CAUSES OF OPD ATTENDANCE IN THE DISTRICT

### **Water and Sanitation**

The proportion of households without any toilet facility is much greater in rural areas (82.2%) than in urban areas (56.6%). Overall, only 8.3 percent of households have improved toilet facilities. That apart, about 89 percent of households dispose of their liquid waste indiscriminately including, throwing liquid waste onto the street/outside.

In terms of solid waste, about 58.6 percent of household dump their waste in the open. Only 1.5 percent of all household dwellings have improved waste disposal method.

The situation has a high potential of not only creating breading grounds for mosquitos and related malaria, creating other sanitation related disease including diarrhea. This calls for sustainable programmes such as the Community Led Total Sanitation (CLTS) to help improve the situation.

### Energy

According to the 2010 PHC out of a total of 8,110 household dwellings, only 39.2 percent are connected to the national grid and as high as 50.4 percent of all the dwelling types use kerosene lamps, whereas 8.3 percent rely on Flashlight/Torch.

Again, of all the households, about 92.3 percent in one way or the other use fuel wood, and as low as 0.3 percent depend on electricity for cooking. Charcoal users constitutes 2.7 percent while gas is only used by 2.2 percent of all the dwellings in the district.

In terms of solar, the District is endowed with extreme large solar radiation resources which could be tapped for solar electricity generation. It is estimated to monthly average of between 4.0 and 6.5kWh/m²/day of sunshine. This coupled with vast land would provide a great potential for off-grid solar power generation especially for the supply of hard to reach communities.
