Physical and natural environment

Relief and drainage

Topographically, the municipality is undulating ranging between 305 and 610 meters and it is interrupted by a stretch of the Akwapim-Mampong Ridge. The Akwapim- Mampong Range serves as a watershed for the numerous of rivers and streams in the municipality. The Municipal is drained by such rivers as Oweri and Afram. The existence of rivers is a potential for the construction of dams for irrigational purposes. The steep slopes at Kyiriyawa near Hwidiem and Onyem have created waterfalls which are yet to be developed as tourist sites.

CLIMATE

The Asante Akim North Municipal experiences wet semi-equatorial climate and temperature and is found to be uniformly high all year round with a mean annual temperature of 26. The rainfall regime is double maxima with total annual rainfall between 125cm and 175cm with peaks occurring in July and November; the first rainy season from May to July and the second from September to November. The monthly average rainfall between 120 and 150 mm. combining temperature and rainfall regimes, four seasons are distinguishable with the municipal micro climate. They are: The harmattan season (Dec-April), the first rainy season (May- July with the peak in June), the monsoon drought (July – August) and the second rainy season (Sept. – Nov). The soils which support vegetation cover and crops are the product of parent rocks and climate conditions. The rich soils and the favourable climatic condition have combined to make possible the cultivation of all

kinds of crops Apart from Bediesi sutana Association and Yaya Pimpimse Association which best support cereals and legumes the rest of the soils can support oil palm, cassava plantain, vegetables, citrus and maize. Beyond Agogo and indeed some parts of the Afram Plains, the most prevalent type of soil is the savannah ochrosol. This soil is well leeched and richly supplied with organic matter nutrients. It supports yam, maize cassava, plantain, vegetables and groundnuts very well. Cashew as a nontraditional export crop can also grow well in this portion of the Municipal.

Tree species found in the forest are Wawa, Ofram, Otie, Sapele, Sanfina, and Onyina among others. In order to maintain the micro-climate, parts of the forest in the Municipal have been reserved. There are four (4) forest reserves in the Municipality. These are the Bandai Hill reserves at Nyinatokrom, Abrewapon, Bebome and Nyamebekyere. The forest reserves serve as an income to the Municipal Assembly and traditional authorities in terms of royalties (stool lands) endowed with mushrooms and snails hence; the Municipal has the potential for mushroom and snail farming.

• Telecommunication

There is one functional post office at the capital, Agogo. Access to postal facilities is almost non-existent in the rural communities thereby undermining effective communication. In addition, all the telecommunication networks in the country are operating in the Municipal with their masts located throughout the Municipal, e.g. MTN, Vodafone, Airtel, Tigo and Globacom. There are also community information centres in Agogo and Juansa as well as Radio Stations in Agogo. There are no landlines in the Municipality so the people rely heavily on mobile phones for communication.

• Financial Institution

The Municipality has a number of financial institutions. These include GCB, two rural banks (Asante Akyem and Afram Community Rural Banks). There are other cooperative credit unions as well as savings and loans companies. These financial institutions are helping the farmers to get access to capital for their projects but the interest and the conditions scare some of the farmers. The assembly is trying to bring the farmers together to form associations and co-operatives where they can access the loans. There are four financial institutions currently operating in the Municipality. They include; GCB Bank Limited, Asante Akim Rural Bank, Afram-Community Bank and Dalex Micro finance.
