PART A: STRATEGIC OVERVIEW OF THE ASSEMBLY

Establishment of the District

The Birim North District Assembly was established by the Local Government (Birim North District Assembly) Legislative Instrument 1987 (L. I. 1422) as part of the government's decentralization programme to promote effective decentralized governance and speed up the development in the District. The District, with its administrative Capital as New Abirem and covers an estimated total land area of 550 kilometers square.

It is bordered to the north by Kwahu West Municipal, to the west by Asante Akim South and Adansi South District all in the Ashanti Region, to the South by Akyeansa and to the East by Atiwa East District and Kwaebibirem Municipal. The District is agrarian in nature with Cocoa and Oil palm as the major crops in the area. The District is also rich in mineral deposits and therefore harbours one of the biggest global mining Companies (Newmont) which has been mining in the District since 2012.

The Service Charter has been developed in pursuant to the Service Delivery Standards of the Local Government Service and in accordance with best practices in Local Governance with the needs of our clients' in focus. The Charter lets you know what you can expect in your dealings with us and also outline how you can help us continue to meet your expectations in our delivery of service.

Population Structure

The population of the Birim North District, according to the 2021 Population and Housing Census, is 82,669 representing 2.8 percent of the Region's total population with an annual growth rate of 2.1%. Males constitute 50.1% whiles females represent 49.9%. The projected population for 2023 is 103,676.

Vision

To be an environmentally Sustainable Mining and Agrarian district.

Mission

To ensure the improvement in the quality of life, of its citizens by mobilizing human, material and financial resources in the District to promote local economic development.

Goals

Team work, Discipline, Client-focus and Timeliness

Core Functions

The functions of the Assembly as given in the Local Governance Act, 2016 (Act 936) section 12 are as follows:

- Be responsible for the overall development of the District.
- Issuance of building permits, business operation licenses, approval of planning schemes layouts and registration of birth and deaths.
- Be responsible for the levying and collection of taxes, rates, duties and fees.
- Be responsible for the development, improvement and management of human settlements and the environment in the district
- Formulate and execute plans, programmes and strategies for the effective mobilization of resources necessary for the overall development of the District.
- Provision of basic socio-economic infrastructure, including Schools, Markets, Lorry parks, institutional Toilets, Roads and facilitate the provision of water.

District Economy

The economic activities carried out in the District include primarily cash and food crop productions, animal husbandry, small scale industrial activities, mining and commerce.

The major cash crop production includes Cocoa and Oil Palm. The district has 70,332 farmers into cash crop production with 45,301 into Cocoa production and 25,031 into Oil Palm production.

The major food crop production includes Maize, Rice, Plantain, Cassava, Cocoyam, and vegetables.

Agriculture

Agriculture is the mainstay of the economy of the Birim North District. About 85.5 percent of the entire labour force in the District is engaged in one form of agricultural enterprise or the other. The district has an area of 28,346.8ha being covered by Cocoa and Oil palm. These cash crop farmers also engage in food

crop production.

Transport

Transport is a non-separable part of any society. It exhibits a close relation to the style of life, the range and location of activities and the goods and services that will be available for consumption. In the Birim North District, the mode of transport is largely by road. Other modes such as rail, river and air are non-existent. The total length of roads is 395.6km, made up of 101 km of trunk roads and 206 km of feeder roads, made up of 88.6 km of gravel and earth surfaces.

The District is fairly accessible from other parts of the country. Roads linking the District to the major cities in the country (Accra, Kumasi, and Cape Coast) are all in poor condition.

Road Network

The road from New Abirem, the District capital to Nkawkaw enroots to Kumasi and Accra is in a bad condition. The New Abirem, Kade-Oda-Swedru road to either Accra or Takoradi are all not in good condition.

It is important to note that almost all the roads in the district are untarred feeder and seasonal roads, which are often rendered impassable, especially during the raining season thereby calling for their regular maintenance. This has therefore increased the use of motor Bikes popularly known as Okada. Couple with this, is the problem of poorly distributed network of feeder roads in relation to settlements, poor condition of roads, limited supply of vehicles, poor condition of transport vehicles, inability of the assembly to administer road contract as well as too many demands on the DACF in the form of statutory deductions only limited portion used for road rehabilitation. The need for

massive road improvement and reconstruction to increase accessibility cannot therefore be over emphasized since road transportation is the major medium of transportation to other sectors like agriculture, industries and social services. This implies that, the overall improvement of the road network, maintenance and rehabilitation will facilitate and lower transportation cost and integrates the Districts rural economy with the urban economy to reduce poverty. The completion of the lorry park at the New Abirem market has help to reduce the traffic situation in the district. Again, the 36.3km road from Nkawkaw to New Abirem is under construction. So is that of New Abirem-Kade and New Abirem —Oda.

Energy

The major source of power in the district is from Electricity Company of Ghana (ECG), The District is connected to the national electricity grid and a sizeable number of households (93%) in towns and villages are supplied with electricity. However, incessant power outage and fluctuation of voltage is major challenge to the Assembly and the District industrial activities. Power in the District is received from the power generation stations in Ghana, particularly from the Akosombo Hydro Station and other IPPs through ECG in the District. The Electricity Company of Ghana (E.C.G) is the sole distributor of electric power in the District. It is envisaged that many more towns and villages will enjoy electricity facility during the plan period.

Health

The district has in totality twenty-two health facilities, which are fairly distributed. That is Government Hospital-1, private Hospital -1, Health centres-6, CHPS-16, and Private Clinic-3. The hospital and other hospitals at Atibie and Nkawkaw serve as the main referral points from the health centers and CHPS centers. The high number of CHPS compounds and its role has contributed to the popularity of the district in areas of CHPS. Students from health institutions visit the district to acquire knowledge and skills in the CHPS concept.

Education

The district has been demarcated into Seven (7) Circuits headed by School Improvement support officers (SISOs) to make supervision and monitoring of schools effective and efficient. The circuits are: Afosu, Akoase, Amuana Praso, New Abirem, Nkwateng, Ntronang and Pankese. There are 188 Public Basic Schools, 62 Private and 3 SHS – New Abirem/Afosu SHS, Akoase St. Michael's SHS and Amuana Praso SHS. The overall Student population in the district is 24,737 consisting of 12,712 boys and 12,025 girls giving the Gender Parity Index (GPI) of 0.96. The overall Teacher population is 1,486 with 770 males and 843 females giving the District pupil Teachers Ratio (PTR) of 1:17.

Market Centres

The major markets days in the District are at New Abirem twice in a week, Afosu, Ntronang, Amuana Praso and Akoase weekly respectively.

Water and Sanitation Water

The availability of and accessibility to improved drinking and domestic use of water is an important aspect of the health of households. Households in the district obtain their drinking water from diverse sources such as public tap, standpipes, boreholes, pump, tube, wells, sachet (Pure water) and bottle water. The main source of drinking water for the urban households is sachet (Pure water), bottle water as well as public tap/standpipes whiles the rural households is borehole, pump, tube and well.

Solid waste

The rate of waste generation and management in the District is a matter of concern to the Assembly. With the rapid urbanization of the district capital and its adjoining communities, huge amounts of waste is being generated at an alarming rate. It is estimated that about 16,594.14 tonnes of solid waste is generated monthly out of which 5,531.38 tonnes are from the ten communities affected by Newmont activities collected. These waste are sent to the Old Abirem engineered landfill site which represents about 33.33%. This leaves a

substantial amount of backlog that creates various kinds of health hazard to people in the District.

Liquid waste

Although there has been an improvement in the toilet facilities especially household latrines, more need to be done to improve public and household latrines in the district. The main types of toilet facilities in the District are K.V.I.P, pit, Aqua Privy and septic. However, as the water table is high, there is the risk of leaching which might cause contamination of underground water. The stench, associated with pit latrine pollutes the air and this presupposes that it should be distanced from the communities, taking due cognizance of the prevailing wind direction.

Tourism

In the Birim North District, tourist attractions in the areas of parks, wildlife sanctuary, picturesque water bodies, historic sites and antiquities abound but they are undeveloped. The District is endowed with as many as five efficiently managed forest reserves that are well resourced with some of the most beautiful flora and fauna which are basic to the development of attractive wild life sanctuaries or parks. At Akrofonsu, near Afosu are Ashanti antique War Bells and a grove that marks the spot where the great Ashanti King, Osei Tutu, was killed. The District also have supportive facilities such as hotels, restaurants and attractive guesthouses. The District Assembly should put in more efforts to develop some of these sites to generate employment and increase its revenue.

ENVIRONMENT

Air, Water and Land Pollution

Due to the rise in illegal mining activities, most of the forest reserves are being depleted at a very fast rate as well as pollutions of most water bodies in the district. Bushfires, sand winning, illegal mining and bad farming practices has resulted in loss of biodiversity, loss of land, reduction in food production and livelihoods of the poor.

However, dense settlements have emerged around the forest zones, well-to-do property owners are putting up properties and investments i.e. hotels anywhere without recourse to the laid down regulation that governs land acquisition and development.

The granting of mining license to Newmont to mine in one of the forest reserves in the district will in no doubt affect the habitat of organisms or their genetic composition directly or indirectly which can alter the biodiversity of that habitat. Even though the company has put in place a lot of measures to forestall environmental effects associated with mining, the dumping of mine waste, noise, heat, vibration, etc. can still be felt by communities around. Couple with this, is the indiscriminate felling of trees by illegal chain saw operators in the various forest reserves in the district which has led to loss of economic trees.

Environment, Climate Change and Green Economy

When we talk about environment, the basic issues that comes to mind is how the earth works, how we are affecting the earth's life-support systems and how to deal with the environmental problems we face.

The major resources used to produce energy in Ghana generally are water and wood. Wood is used extensively for firewood and production of charcoal. Firewood, charcoal, electricity, petrol, kerosene, and diesel are the main sources of energy in the District. Most people (50.1%) use charcoal as fuel for domestic cooking purposes. Charcoal, Wood and gas are the three main sources of cooking fuel in most households in the district. In addition is the activity of illegal mining which has depleted the forest in areas like Noyem, Nyafomang, Mpintimpi, Amenam and some parts of Amanua Praso. Besides, the Ajenjua Bepo forest reserves which have over 18,000 hectares would be affected by Newmont Akyem Mines activities in estimated area of 74 hectares with a pit area of approximately 13% of the 569-hectares of the forest reserve area. Although small, it has the potential to affect temperature in the district, which in the long run will affect soil, water, biodiversity and livelihoods of the vulnerable.

The above activities together with other human interferences have reduced the forest vegetation to that of a secondary forest in the interior. It is to be noted that individual

farmers are engaged in agro-forestry for both food and charcoal and this would be encouraged in the plan period.

Climate Change

Climate change poses an unprecedented challenge to the aim of eradicating hunger and poverty. Birim North district lies within the semi-deciduous forest belt of Ghana and is endowed with mineral resources (Gold) and also with land suitable for crop farming. The district is drained by two major rivers, Pra and Birim with a number of tributaries such as Nwi, Mamang, Adechensu, Sukrang and Afosu rivers. Besides, the district is a home to five forest reserves which induces high precipitation in the district. The Pra river flows south wards and joins the sea at Shama. These features are subject to multiple uses and perform a variety of ecosystem services and functions. Key among the uses of the forest zones are for residential and tourism development, recreation, industrial and commercial.

The forest zone of Birim North District is undergoing rapid transformation due to activities of the fast growing mining industry. There is therefore the need to confine mining and its related development to certain "hot spots" to maintain sustainable livelihoods, protect the environment and the areas of forest reserves including that of Ajenju forest reserves which contain the concession of Newmont Golden Ridge Limited (Akyem Mines of Newmont). This has been identified in the spatial development framework of the district to encourage economic development. Critical forest issues confronting the district were identified through technical assessments and participatory land use mapping exercises involving representatives of diverse stakeholder groups including traditional authorities, men, women and youth.

The outcome of these consultative meetings with stakeholders is the propose Spatial Development Framework. This was in response to pressures of fast growing development which could pose a threat to the ecosystem as well as generate long term benefits for forest ecosystems and their dependent communities. With this in mind, the District Assembly intends to set up Agriculture and Forest Management Subcommittee to drive Integrated Forest Management (A participatory process that will engage communities, private sector, traditional authorities and civil society).

As capacity for forest management increases, spatial planning for the forest belt will be necessary to ensure harmony between traditional uses of the forest farming and mining production activities.

The mechanisms for implementation at the district level are:

- 1. The District's Medium Term Development Plan (MTDP), and Community Action Plans which address settlement growth, economic development and the provision of schools, clinics, other services, roads and infrastructure.
- 2. The District's Spatial Development Framework (SDF), Structure Plans (SPs and Local Plans (LPs), which show what can go where, and resolve potentially conflicting demands on land use in the forest zone.
- 3. Bye laws to define and protect the forest zone.
- 4. Strategic Environmental Assessment which ensure that the necessary environmental protection measures are taken.

The establishment of the Agriculture and Forest Sub-committee is a great step forward for implementing Integrated Forest Management. It provides a necessary forum for integration across sectors such as farming, mining and its related investment activities, land use planning and fresh water supply. The Committee can identify and assess issues, suggest and shape policies, prioritize actions and evaluate outcomes as the Forest Zone is developed.

Green Economy

Green Economy ensures inclusive economic growth, human development and improved well-being through efficient and sustainable use of natural resources while at the same time protecting the environment for generation yet unborn. It is considered as a vehicle to deliver sustainable development rather than a destination itself.

Due to the rise in illegal mining activities, most of the forest reserves are being depleted at a very fast rate as well as pollutions of most water bodies in the district. Bushfires, sand winning, illegal mining and bad farming practices has resulted in loss of biodiversity, loss of land, reduction in food production and livelihoods of the poor.

However, dense settlements have emerged around the forest zones, well-to-do property owners are putting up properties and investments i.e. hotels anywhere without recourse to the laid down regulation that governs land acquisition and development.

The granting of mining license to Newmont to mine in one of the forest reserves in the district will in no doubt affect the habitat of organisms or their genetic composition directly or indirectly which can alter the biodiversity of that habitat. Even though the company has put in place a lot of measures to forestall environmental effects associated with mining, the dumping of mine waste, noise, heat, vibration, etc. can still be felt by communities around. Couple with this, is the indiscriminate felling of trees by illegal chain saw operators in the various forest reserves in the district which has led to loss of economic trees.

VULNERABILITY

Social Protection

Livelihood Empowerment Against Poverty (LEAP) Programme It is a social protection programme meant to give a shortterm plan for reducing poverty and encourage long-term human capital development. This programme is administered

The department in collaboration with Mponua Rural Bank through the E-zwich platform does payment. Currently, the programme is being implemented in Twenty-Two (22) the NHIS constituting Thirty-One (31) males and Thirty-Nine (39) females.

The challenge to this intervention is the delay in the release of funds to the beneficiaries.

Disability

Disability is the inability of at least one part of the body to function properly. The 3% District Assembly Common Fund (DACF) for Persons with Disability (PWDs) is used to support them in education, health, provision of start-up kits, assistive devices, skill training and improve their livelihood. The DACF for PWDs are to minimize poverty among all PWDs particularly those outside the formal sector of employment and to enhance their social image through dignified labour.

There is fund Management Committee that approves the disbursement of funds to support the disabled in the district. Applicants who need the support to improve their lives through petty trading and applicants who need money to support their education and other purposes are vetted and paid by the Fund Management Committee. There are three (3) major disability associations in the district. They include

- 1. Ghana Society of the Physically Disabled
- 2. Ghana National Association of the Deaf
- 3. Ghana Blind Union

However, those whose disability do not fall within these three major categories are captured as "Others" in order not to leave them behind.

| Category of PWDs | Male | Female | Total |
|---------------------|------|--------|-------|
| Physically Disabled | 232 | 231 | 463 |
| Visually Impaired | 108 | 80 | 188 |

GENDER

Most women in the District are farmers and engage in petty trading. In the traditional family set up, men are the family heads. Inheritance is maternal among the dominant population in the District. Women and the girl child are responsible for housekeeping and management. Most women and adolescent females are engaged in commerce (petty trading and hawking). Men on the other hand control economic resources in the family as they tend to inherit family properties (land and buildings) and thereby control productive and economic resources of the extended family.

While there is no gender biases in granting access to available basic public services and institutions, credit and information, the traditional set up has put females at the disadvantaged. An example is in the case of rural water management where there has in the last decade been a deliberate national policy to encourage women to play key roles in the management of rural water facilities yet men still dominate the management bodies in all communities in the District.

Leadership and other administrative functions mainly rest on the shoulders of the men. Women representation in decision-making and employment opportunities is very limited. However, the District can boast of a considerable representation of women discharging their duties at management level.

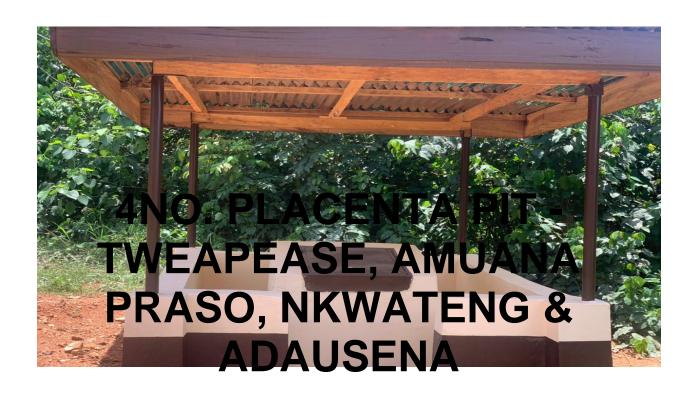

Key Issues/Challenges

- 1. Over population in schools
- 2. Inadequate health facilities
- 3. Poor road connectivity leading to some adjoining communities
- 4. Low income levels among small holder farmers
- 5. Indiscriminate dumping of refuse in some communities
- 6. Pollution of water bodies
- 7. Inadequate Agricultural extension officers in the District
- 8. Inadequate sanitation facilities
- 9. High incidence of teenage pregnancy and HIV/AIDS
- 10. Chieftaincy disputes
- 11. Unwillingness on the part of ratepayers to pay their levy
- 12. Inadequate logistics
- 13. Inadequate data on ratable items

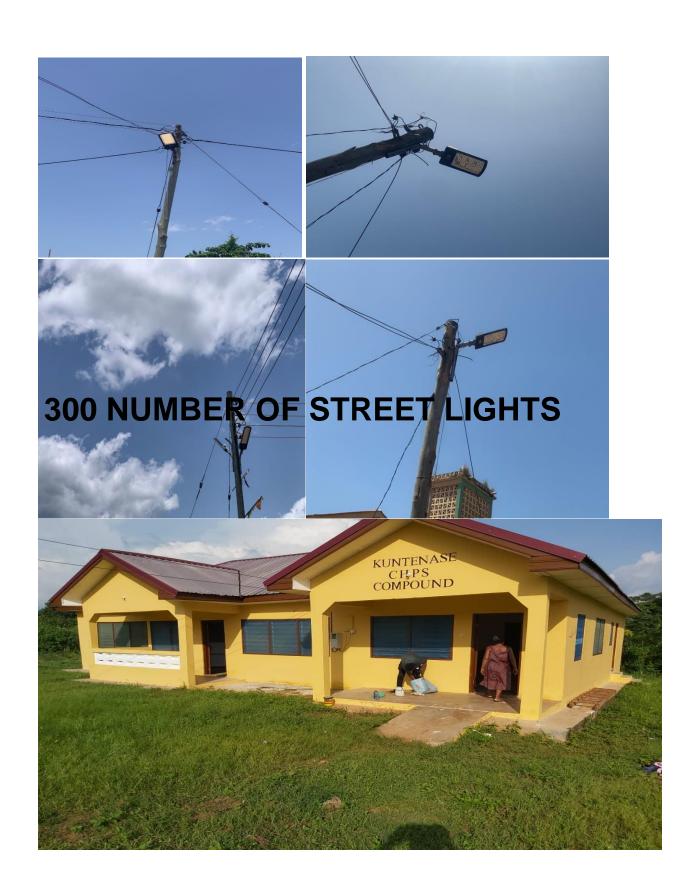

Key Achievements in 2021

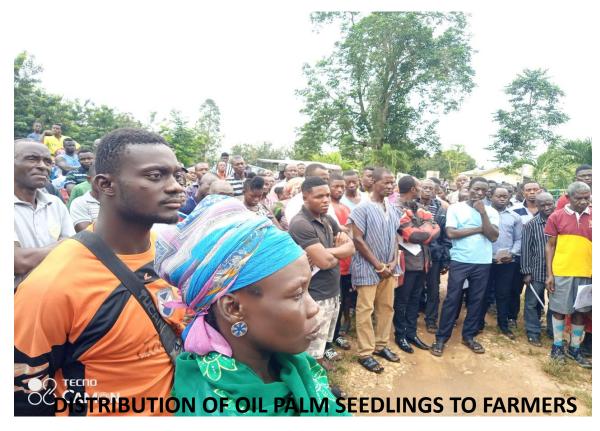

- 1. Constructed fence wall at New Abirem Government Hospital.
- 2. Constructed CHPS Compound at Mpintimpi
- 3. Constructed 12 seater W/C Toilet with Mechanized Borehole Amoa
- 4. Constructed 12 seater W/C Toilet with Mechanized Borehole Adausena
- 5. Constructed 12 seater W/C Toilet with Mechanized Borehole Nyafoman
- 6. 15No. Boreholes fitted with hand pumps.
- 7. Drilled-9, Repaired-2, Mechanized & Developed-4 Boreholes
- 8. Constructed Placenta Pit at Tweapease, Amuana Praso, Nkwateng and Adausena.
- 9. Constructed 6-unit classroom block at Odontuase
- 10. Reshaped Feeder roads district wide
- 11. Supply and Installation of Streetlight District wide
- 12. Distributed certified oil palm seedlings to farmers District wide
- 13. Constructed KG Block at Afosu R/C.
- 14. Renovated CHP's compound at Kuntunase
- 15. Constructed 5 bedroom Teachers Quarters at Hweakwae(Phase I)

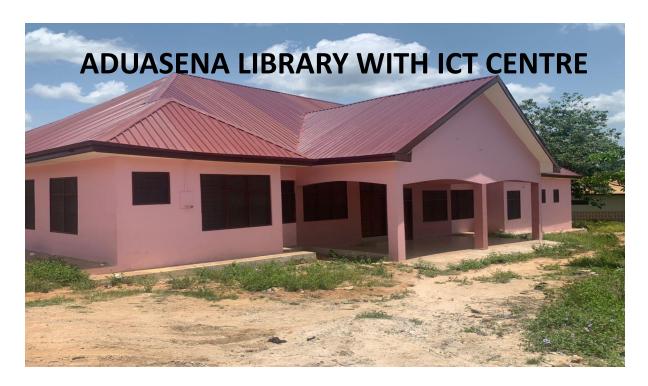

Revenue and Expenditure Performance

In 2022, the total Approved Revenue Budget of the BNDA was GHS 15,947,264.62, which was revised during the midyear as GHS 15,932,694.15 out of which GHS 8,221,064.60 was received. However, the total expenditure for the year was GHS15,932,694.15 out of which GHS 8,263,842.71 was expended as at July, 2022.
