The district economic structure and situation are also presented sectors as agriculture, service and commerce, education, health, environment (water, sanitation and geology), transport and tourism potentials. The district's aspirations as in vision, mission, goals, functions guided by adapted policy objectives are further presented.

Establishment of the District

Bongo District was created in 1988 by Legislative Instrument 1446 (LI 1446) with Bongo as its Administrative Capital.

Population Structure

The 2021 Population and Housing Census gave a district population of 120,254 people. This figure represents 9.2% of the regional population of 1,301,226 people. The sex distribution of the district's population is 56,920 males representing 47.3% and 63,334 females representing 52.7%. The urban population of the district is 7,270 people and the rural population is 112,984 people.

Vision

The vision of the Bongo District Assembly is to have a District with an improved quality of life of the people through creation of jobs, improved health Care, and provision of quality water, sanitation and above all education.

Mission

The Bongo District Assembly exists to improve the lives of the people through the creation of an enabling environment, harnessing its resources, proper co-ordination and integration of activities in the District within the framework of the national policies.

Goals

The goal of the District is to create an enabling environment for sustainable development of all sectors of the economy leading to poverty reduction with a view of enhancing the standard of living of the people by harnessing all available human and material resources through collaborative effort.

Core Functions

The core functions of the Bongo District Assembly are outlined below:

- > See to the overall development of the District
- Ensure the preparation and submission through the RCC, development plans of the District to NDPC; and budgets to MOFEP for approval
- Formulate and execute plans, programmes, strategies for effective mobilization of resources necessary for the overall development of the District

District Economy

Agriculture

Agriculture is the main occupation of the people in the District. About 74% of the labour force are into agriculture (crop farming, animal rearing and fishing). Natural rain is the main water source for crop farming with little irrigational activities. The main agricultural products are groundnuts, sorghum, millet, rice, beans, maize, livestock (cattle, sheep, pigs, goats' donkey, guinea fowls etc.) And vegetables (onion, pepper, okro, etc)

Road Network

Total road network within the District is about km 3,305.65. Comprising engineered roads 294.45km, Bitumen 7.5km, surface 53.5Km and Un-engineered roads 2950km.

Energy

Electricity/energy plays an important role in the socio-economic development of every country or district. This is because it stimulates economic activities leading to improvement in the standards of living of the people. Quite a good number of communities within the District are connected to the national grid through the National and Rural Electrification Programmes and DDF/DPAT and DACF support. However, many of the communities, especially in the rural areas do not have access to electricity. Access to electricity in the entire district is 80%.

Also, the district has Five (5) fuel stations and eight (8) Surface Tanks that serve the district, Bolgatanga Municipality, Nabdam District and foreign vehicles from Burkina Faso. However, a couple of other fuel Stations are at various stages of construction.

Health

The District has 147 communities with 73 health facilities. The breakdown is as follows – 1 Hospital, 7 Health Centres (6 public, 1 private) 2 Clinics (Private) 58 CHPS Zones (24 with structures and 34 without structures), RCH Unit 1, Nutrition Feeding Centers 5, Nutrition Rehabilitation centers 1

The Bongo District like other Districts in Ghana is saddled with so many diseases. Data from Bongo Health Directorate shows that, malaria over the three-year period is the leading cause of OPD attendance with a decrease in the number of cases over the period.

The table below shows the ten causes of OPD attendance 2018 to 2022

Education

The District is divided into 10 circuits, with 265 public and private educational institutions. There are 1,723 trained teachers in the District. The breakdown of the number of educational institutions is as follows:

| - 96 kindergartens | (76 Public, 20 Private) |
|---|-------------------------|
| - 95 Primary Schools | (76 Public, 19 Private) |
| - 63 Junior High Schools | (56 Public, 7 Private) |
| - 7 Senior High Schools | (3 Public, 4Private) |
| - 3 Technical/Vocational Education Training | (Public) |

- 1 University

(1 Private)

The pupil-trained teacher ratio is 1:72 for KG, 1:30 for Primary and 1:14 for JHS.

Market Centres

The District is largely considered as an agrarian economy, it has a three-day market cycle which plays very important role in the local economy. Commodities traded ranges from foodstuffs, livestock and manufactured goods. The major markets of the District are Bongo-Soe, Zorkor, Bongo, Beo, Namoo and Balungu. Minor markets include Feo, Adaboya, Dua, Gowrie, Agamolga and Vea. Other agriculture related activities are (agro-processing – pito brewing, sheabutter extraction, groundnut oil extraction, malt production, rice processing, dawadawa processing).

Water and Sanitation

Water: The District has three (3) Small Town Water Systems located at Bongo, Zorko and Bongo and Seven (7) Limited Mechanized System at Bongo Hospital, Balungu, Vea Health Centre, Zorko Health Centre, Namoo Clinic and Namoo Primary B and Beo, 623 boreholes, 18 dams, and 3 rivers. In all, the District has a potable water coverage of about 76 %.

The major challenge in providing water facilities in the District is the high content of fluoride leading to the capping of so many boreholes. There is therefore the need for Ghana Water Company Ltd. to expand water coverage to communities that are closer to their water systems in the District.

Sanitation: About 63% of the populace practice open defecation due to the limited number of household and institutional latrines across the District. There are only 3 septic tank latrine, 6 KVIP latrines, 1 environ loop, 9 urinals, 127 house-hold water closets, 3,755 household latrines, 8 public toilets, 1 public cemetery, 1 refuse disposal sites and 10 institutional latrines. The District sanitation coverage is 37%.

Tourism

The tourism sector in the district is undeveloped even though a lot of tourists' sites abound in the district, including;

1) The Vea Irrigation dam

- 2) Beautifully formed rocks such as Aposerga and Azudoo rocks located in Bongo town
- 3) Apasepanga footprint, footprint of an ancient warrior located in Bongo town
- 4) Aveamahre crocodile pond
- 5) Beautiful handicraft products such as baskets, hats, and mats which is district-wide
- Leather works and smocks weaving at Sambolgo, Namoo, Feo and other communities in the district.

Out of all these tourist sites, the Vea Irrigation Dam site is fast becoming a holiday resort for holiday makers especially during festivities like Easter, Christmas and other public holidays. The District must take advantage of this great potential and develop it as an ecotourism destination. The beautiful rock formation at Azudoo and Aposerga are also a big tourism potential in the District if developed and marketed. The Assembly in collaboration with the Traditional authorities need to develop these tourist sites into fully fledged tourism destinations in the District.

Environment

The natural environment consists of fauna and flora in general. These include the trees, vegetation covers and rivers. Overall, Bongo District falls within the Guinea Savannah ecological zone. In the past decades, there has been an increase in the amount and intensity of agricultural and other socio-economic activities involving the exploitation of natural resources and human settlement and infrastructural development. These, by their very nature, result in the degradation of the environment. The end result has been to create an adverse effect on the balance between man and nature. This is also creating an imbalance in natural cycles in the biosphere. Inappropriate farming practices, for instance, have led to increased deterioration in both the vegetation and soils. Intensive farming, overgrazing and constant removal of trees and shrubs without adequate replacement have given way for desert-like conditions in many parts of the District. Owing to increased population growth, there is overwhelming pressure on land and water resources.

Wildlife has become threatened as vulnerable tree species die off. These, and many other features, are a manifestation of land degradation, which is a major environmental problem in the district. Land degradation, exhibits itself in three interactive forms: physical, chemical, and biological.

Apart from inappropriate farming practices, land degradation can be attributed to the following factors: high population density, over stocking and overgrazing, bush burning, tree felling, land excavation for road and building construction which has adverse effects to the economy in terms of unpredictable rainfalls which affect food production, health effects among others.

Land degradation is also manifested in soil erosion and loss of organic matter, poor animal production due to reduction in available fodder, siltation of water bodies and loss of aquatic life, trekking long distances to obtain fuel wood by women and increasing intensity and duration of drought.

The over dependence of people on fuel wood and charcoal for both domestic and public use has affected the environment greatly. The few trees available in the district are felled for fuel wood and charcoal for cooking in homes and chop bars. All these factors have contributed to climate change issues in the district and the country at large.

With the exploitation of oil and gas in commercial quantities it is hoped that LPG will be made readily available at affordable prices to enable many more people (both commercial and domestic users) switch from fuel wood to LPG. The provision of this alternative at an affordable price, it is hoped, will go a long way to curb the intensive felling of trees for fuel wood and charcoal in the District. There is also the need to intensify the sensitization and education of the populace on the need to adopt modern farming practices. The table below summarizes the environmental concerns of the district.

| Nature of Concern | Causes | Environmental Effects | Poverty-Environment Link |
|----------------------|--|---|--|
| Land degradation | -Cultural practices and attitudes. -Population pressure -Traditional farming method- slash and burn, shifting cultivation. -Bush fires -Sand and stone winning. -Farming on hill slopes. -Clearing of watersheds and river courses | -Loss of soil fertility. -Loss of biodiversity -Droughts | -Livelihood – low productivity. -Health – reduced water resources, medicinal plants. |

Revenue and Expenditure Performance

The mobilization of revenue in the district for all expenditure items has been improving over the years. However, the Assembly is faced with the challenge of irregular release of funds by central government and low IGF due to leakages and other factors. The tables below show the revenue and expenditure performance of the district.

Revenue Mobilization Strategies

The Assembly will leverage on the Revenue Improvement Action Plan (RIAP) as contained in the table below to realize the total budget of Ghc15,993,859.00 for the 2023 fiscal year. The RIAP is developed to resolve identified revenue mobilization challenges and constraints as poor database and its management, inadequate personnel, lack of logistics, poor motivation and commitment, among others.

The plan of action for 2023 will be implemented in the four (4) focus areas of revenue mobilization, which include Revenue Sources, Mobilization & Collection, Utilization & Service Delivery and Public Education/sensitization (Stakeholders Rights and Responsibilities).
