6. DISTRICT ECONOMY

Agriculture

Agriculture constitutes the highest economic activity in the district. It engages over 94.4% of the total labour force in the municipality. The district is entirely rural hence an agrarian economy. The economy of Wa East is regarded as agrarian, largely due to the district's contribution to the regional food basket and labour absorption. Four types of agricultural activities are identified: crop farming, tree growing, livestock rearing and fish farming. Some of the major crops and livestock produced in the district include the following; Maize, soya beans, rice, millet, groundnuts, sorghum, cattle, sheep, goats, poultry and pigs.

The challenges the people of Wa East face when it comes to agricultural production include erratic rainfall, lack of / inadequate irrigation facilities, and inadequate supply of chemicals to fight fall armyworms.

Road Network

The District has good interconnectivity in terms of road network however most of these roads are very bad as some communities are cut off during the rainy season.

The total kilometres of tarred road in the District is about One Kilometer which is rather on the Bulenga belt.

Energy

Kerosene, fuelwood and charcoal remain the major sources of energy especially for domestic usage in the District. %). Due to the rural nature of the District, a large portion of the district has been connected to the national electricity grid under the self-help electrification programme

Health

The Wa East District has no hospital and patients needing hospital-level care have to access it from hospitals in other Districts such as Wa Municipal, Jirapa, Nadowli-Kaleo or Sissala East. However, there are Seven (7) health centres or Clinics and Thirty-Two (32) Functional Community Based Health Planning Services (CHPS) Compounds to serve the entire population of Wa East District. The district has three (3) private health

facilities to support the existing public facilities. 1D1H is currently on going in the district capital but it is still at the foundation stage.

Inadequate health personnel, couple with inaccessible transportation due to poor road network has made real physical accessibility less than 30%. The travel time per community to access hospital health care ranges from one hour to five hours (1hr to 5hrs). This means that time taken to reach a health facility could affect the chances of survival of sick person(s) in critical conditions. At the moment, there is no permanent DHMT Office and this has been considered as a matter of priority. Also, the District

does not have a Medical Officer as all such cases have to be transferred out of the District.

Education

The Wa East District currently has two (2) Senior High schools, Sixty (60) Junior High schools, Eighty-two (82) Primary schools and Seventy-eight (78) KG. There are no Early Childhood Development Centres. The district has two private schools operating within the Bulenga belt.

The major problem when it comes to education is inadequate furniture in the school for pupils and students to sit on. The problems of inadequate infrastructure in public schools can be found throughout the district, the schools have inadequate recreational, sanitary and library facilities. Most Junior High Schools do not have workshops for practical skills training. Another problem has to do with low enrolment, especially at the Junior School level and poor staffing as many new teachers who were posted to the rural areas were confronted with challenges such as no electricity, poor roads most of them untarred, Poor Telecommunication Networks as well as transportation problems.

Markets Centres

The district is mainly an agrarian society and therefore will need a central point to sell their farm produce. The District have periodic markets which are highly patronized during market days. The following communities have these markets: Funsi, Kundungu, Loggu, Bayiri, Kulkpong and Bulenga.

Other economic activities in the district include shea butter extraction, pito brewery, soap making, smock making, weaving, etc

Water and sanitation

The District has over the years faced many challenges in getting a safe and accessible water supply. This made the indigenes resort to using very unwholesome water for

their daily activities. Even though there is improvement in the portable water supply system through the collaborative efforts of the District Assembly and other stakeholders, much still needs to be done since a majority of the community members still have to walk very long distances to get access to portal water which poses threat to the life of the women and children and it also affects academic work.

The District is improving on sanitation such as solid and liquid waste, the District Assembly and other stakeholders are involved in educating the community members to eradicate open defecation which leaves much to be desired. The commonest method of disposing of refuse is the refuse containers and containers have been provided and placed at vantage points in most communities for refuse collection. Efforts are being made to provide other communities with refuse containers.

Tourism

There are no tourism facilities/sites in the District. However, potential tourist sites in the District include waterfalls at Gbantala, Shrines, rocks, and caves at Bulenga, Bellekpong, Duccie, and Babatu which could be developed as attractive tourist sites.

Envirnment

Vegetation in the District can be broadly classified as forest and savannah woodland.

The environment is faced with some challenges, notable among them are: sand winning, bush fires, logging, Mining and inappropriate farming methods which destabilizes the ecosystem

Financial Services

There are the presences of Rural Banks (Sissala Rural Banks) and GN bank(which is currently undergoing Liquidation) available in the District providing financial service and employment to some citizens.

Key Issues/Challenges

The following have been identified as the key development issues in the District.

- Haphazard, uncoordinated rural development
- Inadequate women representation/participation in public office
- General Low employable skills
- Droughts and floods
- Land degradation (desertification, erosion, poor drainage)
- Poor sanitation
